

## Elbow pain in dogs can be challenging.

We are enrolling patients in a randomized, placebo-controlled clinical trial in dogs with elbow pain.

---

### Study Specifics

We are enrolling client-owned dogs in a study that evaluates the safety and effectiveness of concomitant intra-articular and peri-neural injections of an investigational veterinary therapy for the control of elbow pain in dogs. Owners will be required to bring their dog to the study site for regularly scheduled visits over a 6-month time period. Owners will be required to record daily observations during this time.

### Eligibility:

- Must weigh at least 33 lbs (15 kg)
- Must be at least 1 year of age
- Has a history of persistent lameness due to elbow pain for at least 2 months
- Otherwise in good health or any chronic conditions that are well controlled

### Funding:

This is a fully-funded study. At no cost to owner, qualified patients will receive

- Free veterinary consultation and exams
- Free investigational treatment procedure, including general anesthesia and any required pain medications
- \$100 eGift card at study completion

If you have a patient you believe to be a good candidate for this study OR you are interested in participating as a clinical investigator, please visit [animalci.com/zoe14/](https://animalci.com/zoe14/) for complete details or contact us at ACI: 301.841.0014, ext. 714.
