# GENETIC CONSULTATION

**In collaboration with the Veterinary Genetics Laboratory at the North Carolina State University College of Veterinary Medicine, the AKC Canine Health Foundation (CHF) offers this valuable online resource. Pet owners, breeders, and veterinarians can request consultation with CHF-funded researchers and faculty members to bridge the gap between genetic disease research and practical, clinical recommendations.**

## TOOLS FOR YOU

### PARTICIPATE IN RESEARCH

Learn how you can make a significant impact on canine health research by participating in an AKC Canine Health Foundation-funded study.

### GENETICS RESOURCES

Genetic testing is one of many tools you can use to breed healthier dogs. The AKC Canine Health Foundation sponsors the following resources to help you make the most of this valuable information:

- The **Canine Health Information Center** offered through the Orthopedic Foundation for Animals
- **Genetic Consultation** service offered through the Veterinary Genetics Laboratory at North Carolina State University
- The **Harmonization of Genetic Testing for Dogs** initiative offered through the International Partnership for Dogs

### THERIOGENOLOGY RESIDENCY PROGRAM

The AKC Canine Health Foundation has partnered with the American Kennel Club and Theriogenology Foundation to increase the number of trained practitioners in small animal theriogenology (reproductive medicine) and clinical genetics.

### EDUCATIONAL RESOURCES

Explore helpful information in our Canine Health Bytes webinars and Zoetis Reproduction Podcast Series.
