

Canine food trial for dogs with tumors (benign or malignant).

We are enrolling patients in a food study to evaluate a novel pet food in dogs with different types of cancer or benign tumors.

Study Specifics

Pet owners will receive the investigational diet to feed their dog over a 28-day period along with a scale to properly weigh the food. There is no “placebo diet”. Total study participation lasts 28 days and includes 2 study visits. Pet owners will be required to feed only the study food and complete questionnaires about the novel pet food, the pet’s enthusiasm for eating, quality of life, and stool quality.

Eligibility:

- Must be at least 1 year of age
- Pet has a history of a tumor with either a malignant or benign diagnosis
- Owners must have a smartphone which is no more than 4 years old and be willing to download the study app

Funding:

This is a fully-funded study. At no cost to owner, qualified patients will receive

- Free veterinary exams and lab work (CBC, chemistry, lipid panel, Spec cPL)
- Free investigational food
- \$500 Visa eGift card with study completion

If you have a patient you believe to be a good candidate for this study OR you are interested in participating as a clinical investigator, please visit animalci.com/krebdog/ for complete details or contact us at ACI: 301.841.0014, ext. 714.

Thank you!
