

COMPOUNDING PHARMACY ACCREDITATION

A comprehensive approach to quality pharmaceutical compounding, based on USP guidelines, and recognized as the leading compliance solution.

A commitment to quality is your best strategy for risk mitigation in compounding. Achieving ACHC Accreditation demonstrates your commitment to meeting the highest industry standards for quality and safety.

Pharmacy Compounding Accreditation Board (PCAB) became a brand of ACHC in 2014, and offers the most comprehensive compliance solution in the industry, with standards based on U.S. Pharmacopeial Convention (USP) guidelines. ACHC reviews pharmacies that compound medications whether in the retail, hospital, mail order, or closed-door setting.

"We've had the opportunity to obtain multiple accreditations from both ACHC as well some other accrediting organizations. With that said, through relationships built over the years with the ACHC leadership team, we knew that ACHC represented the values and priorities that we sought as a pharmacy. ACHC portrays an obvious commitment to excellence for both compounding pharmacy and specialty pharmacy that aligns with our commitments to quality and excellence at FountainRx"
