

## The proven enteral pump for everyday living.

The Infinity Enteral Feeding pump has been used for over 15 years by both pediatric and adult tube fed patients. Powerful and lightweight enough to be used on the go, the Infinity delivers nutrition anytime, anywhere.

### Maximum Portability

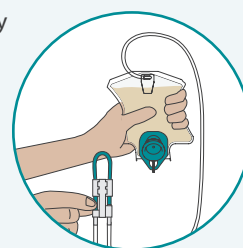

**Pump Size:** Weighing less than 1 pound, the Infinity Pump is easily carried in a custom-designed carry pack for extended use, resulting in fewer limitations to a patient's normal lifestyle.

**Accuracy:** The Infinity Pump maintains  $\pm 5\%$  accuracy at any flow rate and **when operated in any orientation**, even upside down!

**Air Removal:** Infinity delivery sets are specifically designed to easily remove air from the bag and tubing, enabling mobile operation without air-in-line alarms.

Because all air can be removed from the sets, and because the Infinity pump can be safely operated in any orientation, the Infinity is the only enteral feeding pump that offers truly 100% mobile nutrition delivery without restrictions.

### Easy-to-Use

The Infinity Pump features an intuitive design and interface that can be quickly and easily mastered, allowing the caregiver to focus on other areas of care. The easy to load cassette allows for one-handed, consistent set up.

### Rugged

Consistent performance under a wide variety of conditions with 24 hours of continuous battery-powered operation. It does not require any regularly scheduled maintenance or calibration, and can be cleaned with warm soapy water.

When patients are able to be mobile they can live their lives with fewer restrictions – the Infinity Pump makes this happen. Patients using the Infinity Pump are able to go to school, work, or play; and because of the ease-of-use and portability of the pump, they are still able to follow their prescribed feeding schedules.

## Enteral is What We Do

Many manufacturers have a vast number of product offerings that pull them in many different directions.

Moog is different. Our sole focus is on pumps and delivery sets. Our sales team is made up of industry experts that only sell enteral feeding products. Our entire organization is dedicated to delivering enteral-related solutions to you, our customers.

Both the Infinity Orange and Infinity feeding pumps are designed for maximum portability, usability, and safety.

## 24x7 Clinical & Customer Support

Speak live with a Moog Clinical Representative for pump questions and troubleshooting guidance 24 hours per day, 7 days per week. Our Customer Support Team is also available Monday through Friday, 7:00 AM - 5:00 PM (Mountain Time) for customer service assistance such as product line questions, orders, complaints, and RMA support. Call **800.970.2337** for live clinical or customer support.

- ✓ Live stream video training
- ✓ Self paced e-learning
- ✓ On-site education
- ✓ Online training materials including videos, downloads, FAQs, and an interactive tour of the Infinity pump

## Lower Cost of Ownership

When compared to other enteral systems, Infinity pumps can reduce costs by eliminating the need to perform annual maintenance, shortening turnaround times, improving supply chain reliability, providing supply chain reliability, industry leading clinical support, and expert clinical training.

- ✓ No regularly scheduled maintenance
- ✓ No calibration required
- ✓ Shorter turnaround time on repairs
- ✓ Supply chain reliability
