

Contec® Healthcare Visual Guide for Critical Cleaning

DCA

PEC

Buffer Room

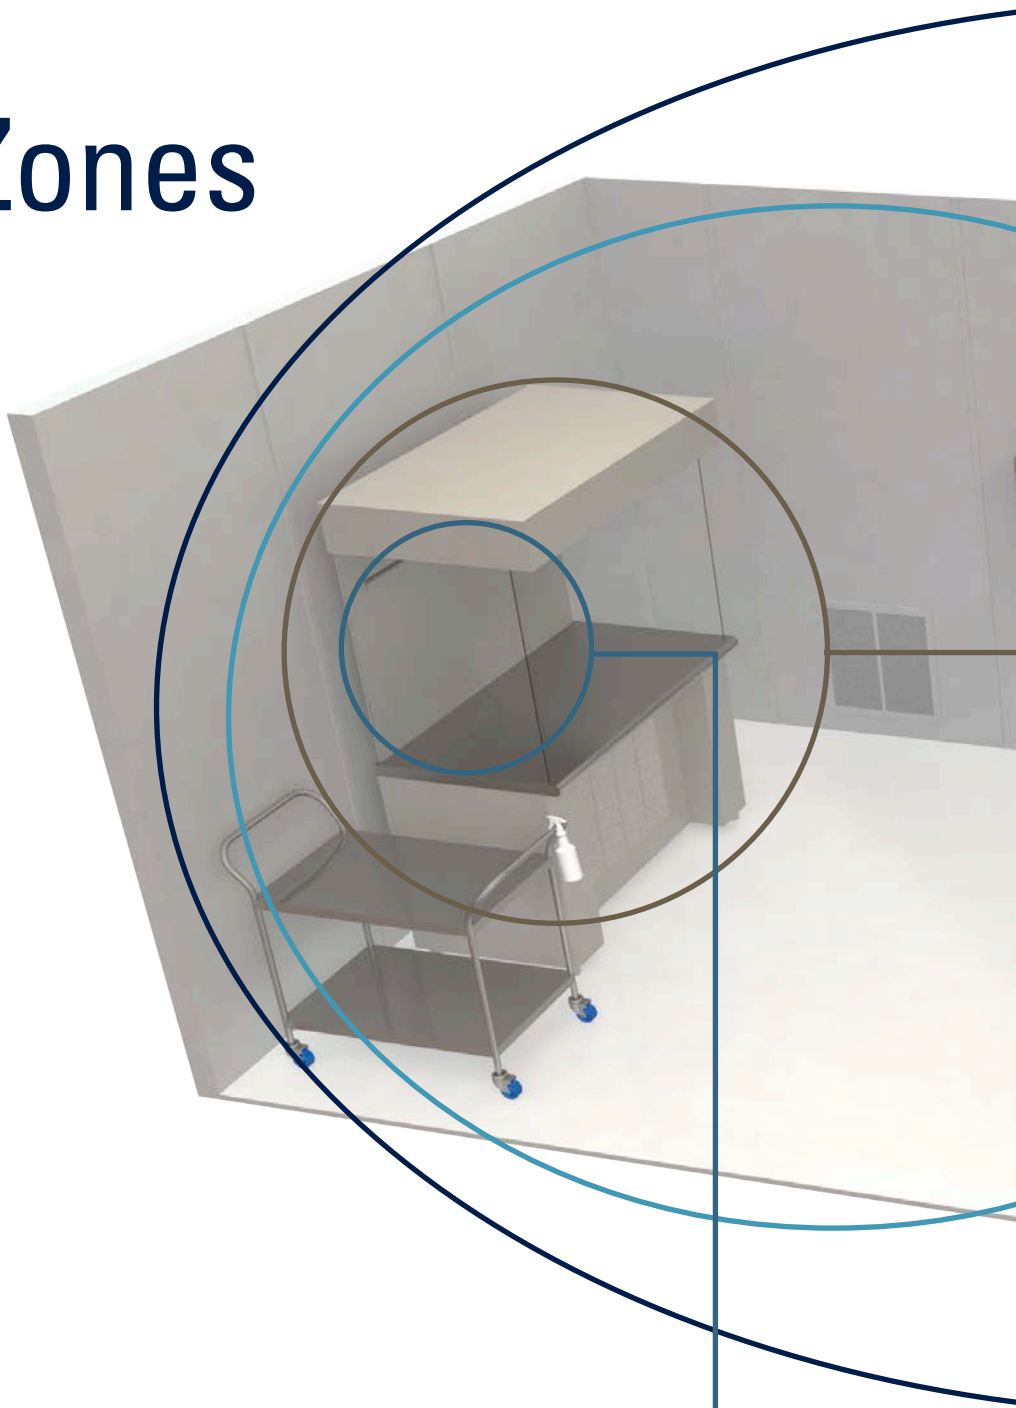

Anteroom

Critical Cleaning Zones

Contec[®] Healthcare is dedicated to being the leader in developing and manufacturing innovative cleaning products for use in critical applications.

We offer many products for cleaning in critical areas where USP <797> and USP <800> compliance has been mandated. Our wipes, solutions and mops are used in sterile compounding pharmacies, hospitals, and other medical environments to clean, decontaminate and sanitize barrier isolators, laminar air flow hoods, cabinets, tables, ceilings, walls and floors.

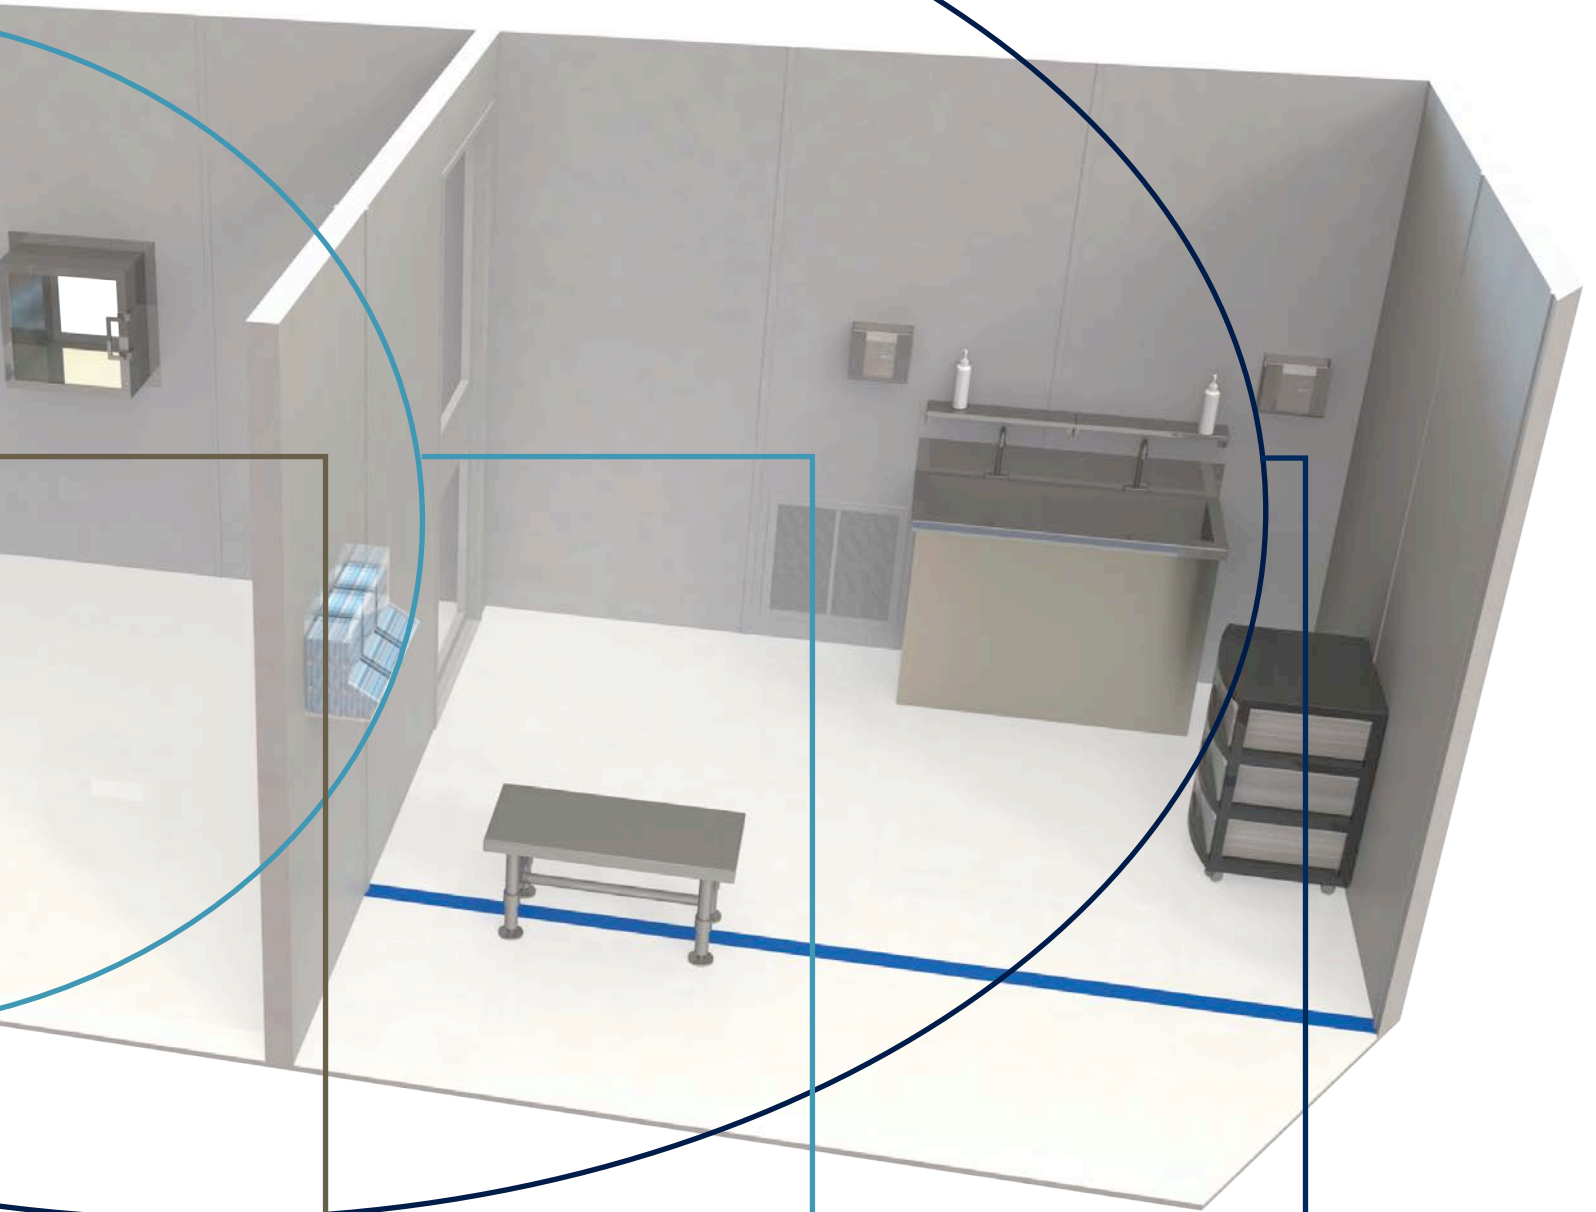

Contec Healthcare has created this visual guide to help provide clarity on USP <797> standards for cleaning and disinfecting. The closer to the center of the circle, the more critical the process becomes and the frequency of cleaning and disinfecting will increase.

DCA

Products designed for use in the DCA (Direct Compounding Area). All critical sites, which include vial stoppers, ampule necks and intravenous bag septums should be manipulated inside the DCA.

C

PEC ISO Class 5

Products designed to clean and disinfect the inside of the PEC (Primary Engineering Control).

B

Buffer Room ISO Class 7

Products designed to clean and disinfect all surfaces (floors, walls, ceilings, work surfaces) inside of the buffer room.

A

Anteroom ISO Class 7 & 8

Products designed to clean and disinfect all surfaces (floors, walls, ceilings, sinks and storage shelves) inside of the anteroom.

PART NO.	DESCRIPTION	SIZE	PACKAGING
HCPS6044	Contec® Critical Site® Sterile Wipes	4 x 4" (10.2x10.2cm)	60 wipes/pouch, 4 pouches/inner bag, 2 inner bags/outer bag, 3 outer bags/case; 1440 wipes/case
