

ONGUARD[®] 2 CLOSED SYSTEM TRANSFER DEVICE

TESTED FOR VAPOR CONTAINMENT
WITH HAZARDOUS DRUGS

YOUR WORK IS HARD

YOUR CSTD SHOULDN'T BE.

OnGuard® 2 is a Closed System Transfer Device (CSTD) designed to prevent accidental exposure to hazardous drugs during compounding and administration. You can meet the real-world challenges you face every day with confidence, knowing you're protected.

TESTED IN THE REAL WORLD

Because you work with hazardous drugs, OnGuard 2 was tested for vapor containment with them—using actual chemotherapy drugs including:

- **5-Fluorouracil**
- **Cyclophosphamide**
- **Doxorubicin-HCL**

Designed to provide safety and protection in your day-to-day compounding and administration.

SAFETY BY DESIGN

OnGuard 2 utilizes CSTD air-cleaning technology. And it's designed to reduce exposure to hazardous drugs. Its unique features are designed to make OnGuard easy to operate and integrate into your pharmacy:

- **Click-to-Lock Technology:** An audible "click" helps confirm a secure connection.
- **Air-Cleaning Technology:** No need to pre-prime or pre-activate.
- **TOXI-GUARD® System:** Activated charcoal drug-binding matrix and 0.2 micron hydrophobic membrane for containment and sterility.
- **Membrane-to-Membrane Connection:** Designed for a dry disconnect.
- **Flat-Surface Design:** Smooth, flat surfaces designed for easy swabbing and disinfection.
- **Modified raw material** to improve compatibility with known hazardous drugs.
- **Not made with DEHP or PVC**
- 7-day microbial ingress testing

SAFETY MADE SIMPLE

OnGuard 2 is meant to be as easy to use as it is safe to use. With air-cleaning and connection technology designed to:

- **Save compounding time**
- **Reduce repetitive motion**
- **Maximize your workspace with fewer components (most compounding can be done with three SKUs)**

It's CSTD protection designed for the real world—yours.

MEET USP <800>

Thanks to its unique features, OnGuard 2 also helps you meet the requirements of USP <800>, the new hazardous drug safety standard.
