

An Easier Way to Implement Vancomycin AUC

Calculating an individualized AUC dose can be time-consuming. DoseMeRx makes it easy.

DoseMeRx is the world's first (and largest) Bayesian dosing platform.

DoseMeRx was developed specifically for clinical practice to optimize dosing and streamline operations, reduce adverse drug events, decrease costs and improve patient outcomes.

Save time, optimize your workflow and patient outcomes

DoseMeRx uses Bayesian dosing to calculate a precise dose to achieve your clinical target. Take a look at what you can achieve with DoseMeRx.

Simple and Easy to Use

Instant access to the web-based solution

Access any time, on every device

Calculate an area under the curve (AUC) dose recommendation in seconds

Flexible Timing of Drug Levels

Just one drug level required to calculate an AUC

Drug levels can be taken at any time

Halve the number of assays required

Decrease Clinical Variation

Data-driven approach to dose optimization

Increased proportion of patients in therapeutic range

Decreases mortality, risk, and adverse drug events

Accessing DoseMeRx

DoseMeRx is simple to use and easy to access, anytime and on every device.

The DoseMeRx solution is available in various configurations. The web-based solution of DoseMeRx is available online, for your convenience. Interested in an integrated solution? DoseMeRx runs seamlessly in all major EHR systems and the Vigilanz Clinical Surveillance Platform.

Why DoseMeRx?

24/7, 365 Support

With offices in the United States and Australia we offer round the clock support. No matter the time – day or night, we're here to help! Someone from our dedicated customer experience team will always be available to help.

Experienced & Trusted

Healthcare providers around the globe trust DoseMe. Over 1,000 clinicians, across more than 100 locations worldwide, rely on DoseMeRx to optimize the vancomycin dosing for thousands of patients.

Safe & Secure

We have a team of experts monitoring DoseMeRx and developing it in accordance with stringent medical device and software guidelines. Our platform is fully-HIPAA compliant so you can rest assure your data is always safe with us.

Easy-to-use

Leave the spreadsheets and complicated software behind you! It'll take you just seconds to do complex calculations using DoseMeRx.

Simple to learn

Learning DoseMeRx is easy and takes just seconds! With training and support offered on all of our plans, you and your team can be up and running in minutes.

"I have been very pleased with the support provided by the DoseMeRx team. They provided us with ample background data, frequent live training sessions, and prompt on-demand support, even on evenings and weekends."

Robert Smith
PharmD, BCGP, BCPS, FASP
Senior Director of Health Outcomes
Neil Medical Group

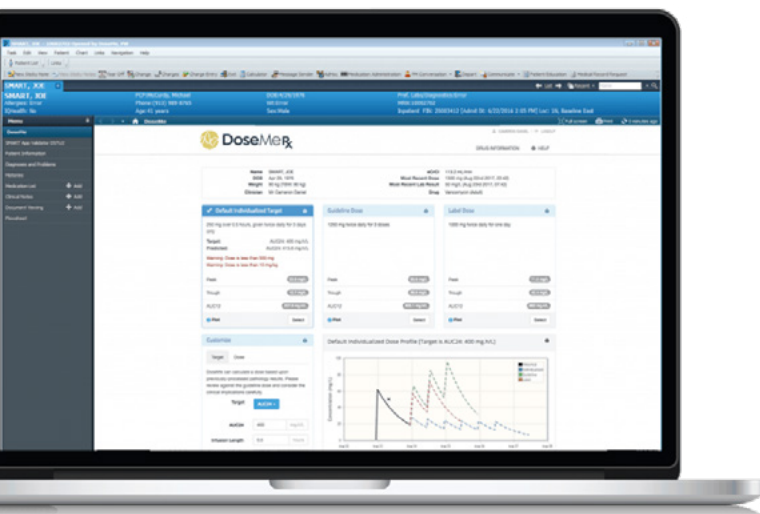

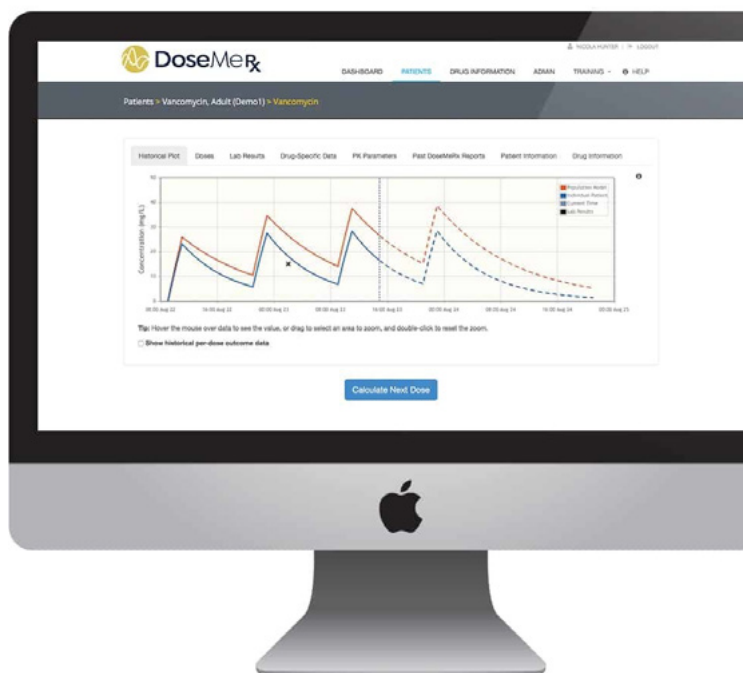

"It's a straight-forward way to implement AUC-based decision making in vancomycin dosing whilst at the same time minimizing the number of levels needed. It's a win, win... DoseMeRx solves my need."

William L. Musick
Pharm. D., BCPS
Residency Program Director
Houston Methodist

Implement AUC based dosing easily with a wide range of vancomycin drug models

With a wide range of clinically validated vancomycin models for adults, pediatrics, and neonates, including obese and hemodialysis sub-populations you can calculate an individualized AUC vancomycin dose with just one level in seconds. For a full list of our models, including other therapeutic areas visit doseme-rx.com/platform

Pricing

A solution for every institution, regardless of your size

Our pricing is fully customized to suit your institution's needs. This is based on the size of your institution and how many drug models you are interested in.
