## **3M Infusion Therapy Solutions for Home and Alternate Sites**

**Helping to reduce the risk of complications  
and protect patients.**

# Every patient matters.

## CLABSI is a serious threat

Every I.V. catheter presents potential for central line-associated bloodstream infections (CLABSI).

UPTO

## 1 IN 4 PATIENTS

WHO CONTRACT CLABSI DIE.<sup>1</sup>

Even when not fatal, CLABSIs can progress to other serious conditions, which can lead to extended hospital stays.

# 71,900

PREVENTABLE CENTRAL LINE  
INFECTIONS ANNUALLY.<sup>2</sup>

In addition, complications such as infection, dislodgement or skin damage can potentially cause patient's discomfort and pain, additional therapy needs, hospital/surgical intervention and increased mortality.

Our broad portfolio of solutions includes evidence-based products, education and training to help improve outcomes and patient satisfaction.

# 3M can help.

## Three key elements to reducing complications.

As your trusted partner in protecting patients, 3M can provide support and help to:

- Educate and help your **PEOPLE** with our 3M<sup>SM</sup> Health Care Academy and Inservicing
- Provide training to your teams to implement evidence based **PRACTICE** with our Account Managers and Clinical Specialists
- Offer high-quality **PRODUCTS** with clinically tested, proven outcomes

We share your goal of minimizing complications and want to do everything in our power to help you achieve this.

## 3M<sup>SM</sup> Health Care Academy

3M Health Care Academy offers online continuing education for healthcare professionals and contains over 50 free courses. This education resource is dedicated to helping you focus on deepening your expertise and improving patient care.

**For more information visit:**  
**[3M.com/learningconnection](https://www.3m.com/learningconnection)**

## 3M Resources

3M sales representatives and our team of field-based I.V. Clinical Specialists can help facilities implement the use of 3M solutions and help you achieve ongoing compliance.

### We can assist with:

Ongoing training and support.

Clinical expertise regarding standards, processes and guidelines.

Clinical knowledge on how 3M products can help you achieve successful outcomes.

Planning resources and guidance.

# Helping to reduce complications — your patients depend on you.

## Solutions for helping reduce the risk of preventable infections

### 3M™ Curox™ Disinfecting Port Protectors\*

Consistent use of 3M™ Curox™ Disinfecting Caps for Needleless Connectors is associated with reduced risk of central line-associated bloodstream infection (CLABSI).<sup>3</sup> 3M™ Curox™ Disinfecting Port Protectors are alcohol impregnated caps that twist onto I.V. access points for disinfection and protection. They disinfect prior to line access and act as a physical barrier to contamination between accesses. Use of Curox disinfecting caps help to:

- Helps reduce the risk of CLABSI
- Remove manual scrub technique variation
- Save time
- Provide visual compliance confirmation
- Provide a physical barrier

### 3M™ Tegaderm™ CHG I.V. Securement Dressing<sup>4</sup>

The only transparent dressing proven to reduce catheter-related bloodstream infection (CRBSI) and vascular catheter colonization.

- 2% CHG gel pad
- Integrated design for consistent application
- Provides site visibility
- Catheter securement

The safety and effectiveness of 3M™ Tegaderm™ CHG I.V. Securement Dressing has not been established in children under 18 years of age.

### 3M™ Avagard™ Surgical and Healthcare Personnel Hand Antiseptic with Moisturizers (Chlorhexidine gluconate 1% solution and Ethyl alcohol 61% w/w)<sup>†</sup>

The first and only FDA NDA approved waterless brushless surgical hand antiseptic with two active ingredients, CHG and alcohol.

- Proven efficacy — provides rapid antimicrobial kill
- Provides persistence with continued antimicrobial activity for up to 6 hours
- USP 797 and USP 800 compliant
- Hands-free wall dispenser

### 3M™ Health Care Particulate Respirators and Surgical Masks

3M offers a variety of respiratory solutions to help employers meet USP 800 and OSHA regulations — ranging from N95 particulate respirators to powered air purifying respirators (PAPRs).<sup>\*\*</sup>

#### Filtering facepiece respirators (sometimes called disposable respirators):

- 3M proprietary filter media
- Fluid resistant to splash and splatter of blood and other infectious materials
- N95 respirators have filtration efficiency of at least 95% against particles per NIOSH test
- Variety of designs to choose from to help accommodate your employees
- Models shown are FDA cleared as surgical masks

#### Reusable respirators:

- Provide an additional option to consider when handling hazardous drugs
- Reusable respirators and PAPRs must be used with appropriate cartridges and/or filters (sold separately)
- P100 and HEPA filters have filtration efficiency of at least 99.97% against particles per NIOSH test.  
Access our Respiratory Protection Guidance for Hazardous Drug Handling in Healthcare technical bulletin here: [3M.com/Healthcare\\_Guidance](https://www.3m.com/Healthcare_Guidance)

Solutions for helping reduce the risk of preventable infections

## Solutions for safely securing devices

### 3M™ PICC/CVC Securement Device + 3M™ Tegaderm™ I.V. Advanced Securement Dressing

Designed to minimize catheter migration and dislodgement complications for more active patients and other situations requiring the highest level of catheter securement.<sup>5</sup>

- Silicone adhesive balances secure adhesion with gentleness to skin
- Withstands higher pull force with better results than any securement method tested<sup>6</sup>
- Easier to apply and remove than competitive devices<sup>7</sup>
- Also available with integrated CHG gel pad\*\*

### 3M™ Tegaderm™ I.V. Advanced Securement Dressings

Dressings include a deep notch, stabilization border and dual adhesive technology to provide the comfort and protection your patients deserve while meeting the CDC and INS definitions as a catheter securement or stabilization device.

- A waterproof, sterile film barrier protects against external contaminants<sup>8</sup> through this highly breathable transparent film
- Conforming edge border designed to reduce edge lift
- Reinforced stabilization borders maximizes securement without compromising patient comfort
- Large tape strips provide consistent application
- Safe to wear for up to 7 days

Solutions for safely securing devices

Helping to reduce costly complications and improve patient experience.

Solutions for maintaining skin health

### 3M™ Medical Tapes

Clinicians are able to raise the standard of patient care by choosing the right securement for the right application. To help reduce the risk of cross contamination, and to minimize waste, 3M offers many of its tapes in packaged single-patient-use-rolls.

## Solutions for maintaining skin health

### 3M™ Cavilon™ No Sting Barrier Film†

Forms a protective barrier between the skin and the adhesive of the securement dressing, device or tape to help prevent Medical Adhesive-Related Skin Injuries (MARS). When an adhesive product is removed from the skin, Cavilon No Sting Barrier Film is removed instead of skin cells.<sup>9</sup>

- The original sterile alcohol-free barrier film
- CHG compatible

\* Caution: Federal Law (U.S.A.) restricts the device to sale by or on order of a licensed health care professional.

\*\* Always read and follow *User Instructions*. Caution: Federal Law (U.S.A.) restricts the device to sale by or on order of a licensed health care professional.

† Flammable. Please consult *Instructions for Use* for application and dry times.

	TR-600-HKL	Versaflo PAPR Kit, 1/case	

\*Reusable respirators and PAPRs must be used with appropriate cartridges and filters (sold separately).

**⚠WARNING**

These respirators help reduce exposures to certain airborne particulates. Before use, the wearer must read and understand the *User Instructions* provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. **Misuse may result in injury, illness or death.** For correct use, consult supervisor and *User Instructions*, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.
