

TELEHEALTH SUPPORT

**CHADIS complements telehealth by
providing remote digital patient data.**

www.chadis.com

Telehealth Support

- Pre-visit patient data helps with documentation while focusing on your video patient
- Graphics for shared decision making that can be viewed during televisits,
- Patient-specific education in secure individualized webpages
- Ability to schedule dates for questionnaires for follow up and care management
- CHADIS Care Coordination functionality facilitates referrals and data sharing and automatically tracks them.
- CHADIS can serve as a secure, simple, and inexpensive electronic record accepting clinician notes and formatting for easy printing or pdf creation of referral notes.

100's of Child and Adult Questionnaires and Tools for the Whole Family

- Social Determinants of Health
- EPSDT Questionnaires
- Private portal for teens
- Visit Priorities or Chief Concern
- General Health Questionnaires
- Behavioral Health Questionnaires
- Developmental and Autism Questionnaires
- Child and adult questionnaires in various languages

Patient Education /Electronic Handouts

- "Developmental prescriptions" created based on the child's milestones
- Tailored safety guidance
- Anxiety-related resources
- CHADIS Care Portal can provide personalized treatment plans (e.g. Asthma Action Plan; ADHD goal-related messages) that can be updated remotely by the clinician.
