

# ABOUT INNOV8

Innov8 is impacting real issues and creating real change in identifying early concerns for autism and childhood development. Quality care with top rate providers should be easier for families on a schedule that works for them. We are building a community of experts combined with technology that will make assessing a child's development accessible and timely. Your expertise is needed to dismantle the barriers for these families. Come join us!

# CARE MADE EASY

## HOW DOES IT WORK?

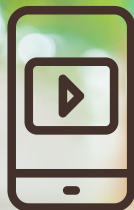

### PROVIDER REGISTRATION

## FOUR EASY STEPS

Create an account and input your credentials to be verification. If you are not ADOS trained sign up now and stay up to date on dates and locations of training.

Pick a patient in the queue in the state you are licensed in. Screen three videos uploaded by patient.

Submit your screening report and select the next patient in the queue that needs your expertise.

We then connect the client with providers in their area to meet the client's needs.

Peace of mind is choosing care that is easy, accessible, and convenient.

The process of getting a child diagnosed with autism can take an average of 9 – 48 months and many thousands of dollars. This essentially withholds critical early services a child needs. With our approach and your expertise we will virtually eliminate wait times and significantly reduce the cost of diagnosis allowing access to critical early intervention.
