Our faculty and team are committed to partnering with you and your patients. We have expertise in all aspects of pediatric cardiac care, including:

- Congenital heart defects
- Adult Congenital Heart Disease
 - Multi-disciplinary care involving ACHD-certified cardiologists coordinating care with specialists in pulmonology, hepatology, and advanced heart failure
- Cardiac catheterization
 - Diagnostic cardiac catheterization
 - Interventional procedures (balloon dilation, device closure of defects, stent and valve implantation)
- Cardiac Imaging
 - Transthoracic echocardiography
 - Transesophageal echocardiography
 - Cardiac MRI
 - CT angiography
 - 3D reconstruction and modeling of the heart
- Chest pain
- Dizziness and syncope
- Electrophysiology
 - Pediatric and Adult Congenital Care
 - Diagnostic testing (electrophysiology, drug challenge, tilt table)
 - Ablation of complex arrhythmias
 - Implantation and testing devices (pacemakers, defibrillators)
- Fetal cardiology
 - Fetal echocardiography
 - Diagnosis and treatment of fetal arrhythmias
 - Multi-disciplinary care involving fetal cardiologists coordinating care with specialists in maternal-fetal medicine, neonatology, interventional cardiology and cardiac surgery
- Genetic syndromes associated with heart defects
 - Marfan syndrome
 - Down syndrome
 - Noonan syndrome
- Heart murmurs
- Preventive cardiology
 - Dyslipidemia
 - Hypertension in obese patients
- Surgical repair of heart defects
 - Complex neonatal cardiac surgery (Norwood procedure, arterial switch operation)
 - Atrioventricular canal repair
 - Closure of atrial and ventricular septal defects
