

**Dayspring<sup>®</sup>****For Lives in Motion**

## Reimagining Treatments for Lymphedema and Venous Diseases

Dayspring is the first active dynamic compression treatment<sup>1</sup> designed for mobility and movement while promoting lymph fluid flow — so your patients can get the treatments they need while continuing their daily living.

- ▶ **Non-pneumatic active dynamic compression**
- ▶ **Supports natural body movements and patient mobility**
- ▶ **May ease the transition from in-clinic care to home care**
- ▶ **Safe, effective and clinically proven**

“ I really appreciate the flexibility that I have using Dayspring. I’m able to do a lot of my daily activities while I’m getting treatment. ”

— **Janesta | Dayspring User**

\*Actual individual experiences may vary

# The Dayspring Difference

Supports Optimal Fluid Movement in Three Important Ways

## **Designed with Lymphatic Dynamics in Mind**

Innovative Flexframe™ technology specifically designed to gently stretch the skin and stimulate the lymphatic capillaries

## **Delivers Dynamic Therapeutic Active Compression**

Provides a range of easily customizable therapeutic compression pressures

## **Supports Natural Muscle Contractions and Joint Movements to Enhance Lymph Flow**

Allows patients to treat and engage their muscles and joints through existing routines

## **Safe, Effective and Clinically Proven**

Dayspring is FDA cleared<sup>1</sup> and has demonstrated safety and effectiveness across a multitude of clinical studies including multi-site, randomized clinical trials. In the most recent trial, Dayspring users showed:<sup>2</sup>

**Significantly greater mean reduction in edema volume of 63.3% compared to 27.7% with a traditional pump**

## **At-Home Treatment That's Actually Manageable**

A prescription-only adjunctive treatment designed to help patients perform home treatment without getting in the way. Dayspring users showed:

**Significantly higher adherence rate of 95.6% compared to 49.8% with a traditional pump<sup>2</sup>**

**Significant improvements in Quality of Life measures (LYMQOL)<sup>2</sup>**
