

# TIMS MVP® 4.5

**The ultimate solution for recording, editing, & archiving of modified barium swallow studies**

**Still using only fluoro or low quality DVD-video?  
Upgrade to high resolution, improved efficiency, & synced audio.**

TIMS MVP® is the fourth generation medical imaging product from TIMS Medical. Built for speed and productivity, it is designed to streamline your workflow and result in more studies per day from your imaging suites. Just some of the advanced features include:

#### **High Resolution Video with Synced Audio**

Automated recording & 4 times more detail than DVD-video

#### **Label Video Clips During Recording**

Save at least 5 minutes per study!

#### **Send Studies in DICOM to PACS/VNA**

Easy archiving & PACS disk space savings of 75% to 90%

#### **Remote Review & Analysis with TIMS Review®**

Frees up imaging suite for more studies per day

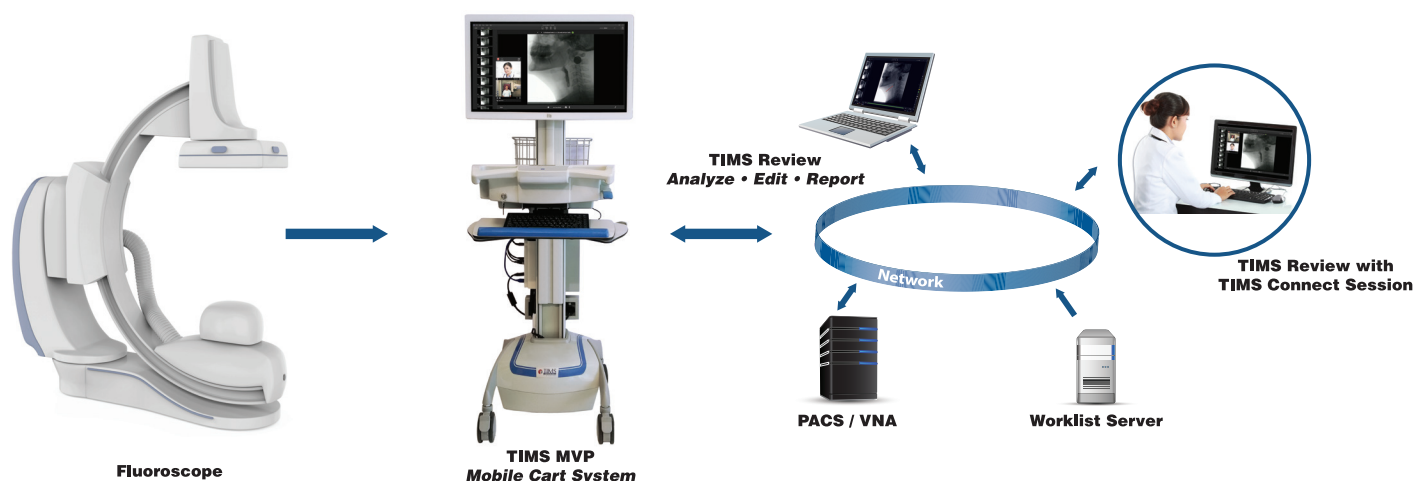

- Windows 10 Pro 64 bit workstation
- 30 frames per second
- Select patients from your worklist for automated input
- Triggers with your modality for automated recording
- Unlimited video recording length
- Your work is automatically saved at all times
- Custom label lists
- Archive in DICOM to any PACS/VNA
- Archive to CD/DVD, USB, & network
- Eliminate removable media from workflow to reduce HIPAA risk

- Scoring (MBSImP, DIGEST, PAS, FOIS)
- Measurement (Distance, Area, Velocity)
- Export studies in MP4
- Remote review & analysis with TIMS Review
- Graphic telestration & annotation
- Stopwatch & study timers
- Non-destructive video editing
- Comprehensive Support & Maintenance
- Built-in & online training guides
- User interface built for speed & productivity
- Live stream with TIMS Connect® (optional)

**TIMS Medical Video Platform™ | Record • Edit • Archive • Collaborate**

# TIMS MVP, TIMS Review, & TIMS Connect Workflow

## Workflow: Speed & Productivity!

With over 5000 installations worldwide, TIMS Medical has continuously worked with SLPs and endoscopists to optimize their workflows. TIMS MVP takes productivity to the next level for the power user, the new user, and everyone in between.

### For the simplest of workflows:

- 1 - Input the patient information by selecting from the patient list in the worklist.
- 2 - Record the entire study automatically with synced audio.
- 3 - Quickly label your video series on-the-fly to save at least 5 minutes on every MBS study.
- 4 - Archive in DICOM to PACS/VNA and/or send to a TIMS Review system in your lab or office for analysis.

Extensive tools are available for quick & simple editing, annotating or telestrating on video, timing analysis, video review & analysis, scoring (MBSImp, DIGEST, PAS, FOIS), measurement, and anonymized exporting in MP4 format for presentations and reports.

**TIMS Review:** One license of the TIMS Review software application is included with every TIMS System, and can be installed on any Windows 10 computer in the speech pathology or endoscopy office/lab area. To speed workflow and immediately free up the fluoroscopy or endoscopy suite for the next patient, the study can be sent immediately over the hospital network from the procedure room to one or more TIMS Review systems throughout the hospital. Clinicians can then edit, annotate, review, and analyze the studies from their offices, while freeing up the procedure rooms to enable more studies per day for the hospital.

**TIMS Connect:** TIMS Connect is a software add-on to any TIMS MVP system that provides instant collaboration by live streaming modality video from the procedure room. Colleagues can join from any hospital computer to participate as a study is performed. Optional remote control, built-in webcam support, and two-way audio & video communication are provided.

## TIMS MVP Ordering Guide

**TIMS 2000 SP** - Includes 24" LCD monitor, standard onsite installation & training, TIMS Review, & one year of Support & Maintenance.

**TIMS 2000 SP5** - Includes 24" LCD monitor, standard onsite installation & training, TIMS Review, & five years of Support & Maintenance.

**TIMS 2000 SP MCP** - Includes 27" touch screen monitor, mobile cart, standard onsite installation & training, TIMS Review, & one year of Support & Maintenance.

**TIMS 2000 SP5 MCP** - Includes 27" touch screen monitor, mobile cart, standard onsite installation & training, TIMS Review, & five years of Support & Maintenance.
