

Sign Up Today for Training on Installation of Spellman High Voltage Generators

Spellman's SHERPATM training platform is designed to help busy field based service engineers receive the training they require on Spellman's line of hospital grade HFe generators and AGFA's Musica imaging solutions. Each comprehensive 3-day course is offered in person (at our SHERPA Training facility) or via our completely interactive platform, led by our experienced instructors using the latest audio, visual and remote support technologies to help you achieve valuable operations knowledge from the comfort of work or home office.

Available Training Dates for HFe and HFe-AGFA:

August: 3, 4, 5*
September: 7, 8, 9*
October: 12, 13, 14*

*Third day is for non-AGFA dealers only.

- ✓ Laptop setup and explanation of HFe Service Utility Tool
- ✓ How to connect to external devices; X-Ray tube, AEC ion chambers, and collimator (including AC line).
- ✓ Calibration of AEC chambers and filament
- ✓ How to configure Agfa Musica setting
- ✓ Adjusting APRs and receptor settings in the AGFA Musica environment
- ✓ Physical connections and software requirements for AGFA Musica integration
- ✓ Review of schematics and block diagrams to develop effective troubleshooting skills for the HFe generator and Agfa Musica fully integrated system
