

## TESTIMONIALS

“ Louise Miller is one of the real gems of the breast imaging world. She is a great teacher, innovator, imager, author, and passionate advocate for women and women’s imaging. She has been generous enough to share her talents with all of us in so many ways over the years. There is no one better at positioning than she, and through her teaching, she has truly elevated the level of mammography throughout this country, and indeed, much of the rest of the world. I am proud and honored to consider her both a trusted colleague and a dear friend. ”

- Michael N. Linver, MD, FACR, FSBI  
Director Emeritus of Mammography

“ I did not think that most of my techs could get any better, but I have seen more depth and less folds from all of the techs! Some of the less experienced techs have had a marked improvement. They are still talking about how great you were. Thanks for engaging them. I really liked your talk and hope that writing a book is on your agenda! ”

- Jennifer Harvey, M.D., F.A.C.R.  
Chair of Imaging Sciences  
University of Rochester Medical Center

“ I am very excited about Mammography Educators as a company. I am a manager to a mid-size breast imaging center that serves about 18,000 patients in Illinois. Mammography Educators offers the dynamic and exciting continuing education seminars that my staff of 15 technologists need each year as well as promoting optimization in image quality improvement with the development of standardized positioning guidelines that we all need as women. No other company has developed the tools to teach standardized positioning techniques for Mammography. ”

- Tammie Taeger-Turco BA (R.)(T.)(M.)  
Alexian Brothers Medical Center

# MAMMOGRAPHY EDUCATORS

was founded by Louise Miller and Amy Chatten in 2013. Prior to this date, Ms. Miller started the first Mammography Practicum affiliated with an academic institution at the University of California San Diego School of Medicine, where she taught for over 25 years. Ms. Chatten joined Ms. Miller as the Breast Imaging Manager at UCSD where they began their collaborative effort to advance imaging quality standards in mammography. Ms. Miller has also consulted at over 500 Breast Centers worldwide.

Mammography Educators focuses on establishing high-quality, consistent methods of breast imaging using **The Miller Method™**. We provide three essential types of services: breast imaging training/consulting, mammography conferences, and initial mammography training. We also develop educational products to support our mission and vision.

Mammography Educators is committed to providing an exemplary experience for every technologist, administrator, and radiologist with whom we work.

**Louise Miller,**  
R.T.(R)(M)(ARRT), CRT(M),  
FSBI, FNCBC

Co-founder and Director of Education of Mammography Educators, has made a significant impact on the field of breast imaging on a local, national, and international level.

## MAMMOGRAPHY CONSULTING

On-site, hands-on mammography positioning training for technologists featuring **The Miller Method™**, in addition to other consulting services, both on-site and remotely, to assist breast centers with accreditation and inspection preparation, patient tracking, breast center operations, and workflow analysis.

We specialize in the following areas:

- Mammography Positioning Skills
- Mammography Accreditation and Inspection Preparation
- Operations & Workflow Analysis

## ACCREDITATION AND INSPECTION PREPARATION

Mammography Educators provides consulting on-site and remotely to assist with:

- ACR Accreditation Applications
- MQSA Inspection Preparation
- Compliance Review, including policy and procedure recommendations, patient tracking, use of specialized information systems, and practice standards.

If ACR has recommended that you or your facility obtain 8 hours of positioning training related to your re-accreditation, please contact us. We can provide immediate positioning training that meets ACR requirements.

**Amy Chatten, MPH**

Executive Director and co-founder of Mammography Educators. She has her Master's in Public Health with a focus on maternal and child health.

## CONFERENCES

Mammography Educators has trained over 50,000 technologists in the United States and Canada since 1990. These professional, interactive, and dynamic mammography conferences are offered as either one-day (6-8 credits) or two-day programs (15 credits) throughout the United States and Canada.

## INITIAL MAMMOGRAPHY TRAINING COURSE

- 40-hour Category A CEUs
- Meets MQSA Requirements
- 8 Hours of Digital Mammography Training Included
- Hands-on Positioning Workshop
- Academic-based Faculty
- Over 30 Years of Mammography Initial Training Experience

## ADDITIONAL SERVICES OFFERED

- Breast Ultrasound & Biopsy Training
- Mobile Mammography Start-up
- Clinical Breast Examination Training
- Ergonomic Assessments
- Ongoing Quality Improvement Programs
- Expert Witness Services
