

Workflow Matters

eRAD automates the clinical and business workflow of medical imaging. The result is enterprise-level collaboration, hassle-free compliance, and improved patient care.

"We were hooked by eRAD's commitment to our success. It was clear that everyone—from sales to service—understood our approach and our goals as a diagnostic outpatient network."

in Imaging

EHR-Certified RIS

Our flagship solution streamlines operations across the enterprise. A robust, comprehensive suite eliminates the need for multiple third-party tools, making even multi-site workflows seamless and dynamic.

Speech Recognition

Bypass complex interfaces and third-party logins with integrated speech technology. Voice navigation, auto-loading templates mapped to procedure codes, and roaming profiles help speed turn-around times.

Mammo Tracking

Use a single, fully MQSA-compliant solution for flexible and targeted follow-up, including BI-RADS® tracking. Integration directly into the workflow eliminates the complexity of third-party add-ons and multiple logins.

Secure Communication

Communicate quickly and securely with patients and referring physicians, seamlessly from the workflow. HIPAA-compliant appointment reminders, photo sharing, instant messages, and CTRM boost efficiency.

Cloud Solutions

Take advantage of a complete imaging infrastructure as you scale. Get hardware, software, services, bandwidth, IT expertise and management, and more—all with convenient utilization-based pricing.

Professional Services

Strong relationships go hand-in-hand with technical innovation. We deliver the training, support, and other services you need to succeed. Best-in-class service is our commitment to our customers.

PACS Evolution

Our next-generation platform has been built from the ground up to deliver greater speed and performance with a new 64-bit diagnostic viewer and server, intuitive interface, and user-defined toolsets.

Global Worklist

A unified worklist consolidates disparate PACS for distributed reading. One coherent platform with a single login supports rules-based load balancing, pre-caching, and remote diagnostic report creation.

Mammo Reading

Get multi-modality reads on the same workstation—no transmission disruptions and no overhead for a dedicated mammo workstation. Full mammo-specific tools for precise results.

Physician and Patient Portals

Optimized for use with mobile devices, our patient and physician portals deliver HIPAA-compliant access—for online scheduling, clearer communication, and viewing of reports with images.

Real-Time Insurance Verification

Take the surprise out of billing with real-time, accurate confirmation of insurance eligibility—including patient coverage, co-pay, total deductible, and remaining deductible.
