

Get precise body measurements remotely-no touch and no room for error. 3DLOOK is a self-service, body scanning technology that supports Burlington Medical's made-to-measure capabilities for safe measuring without the need for in-person fittings.

SmartID™ Is a web-based inspection and inventory asset management system for radiation protection products. Each item comes tagged with a unique QR code that can be scanned with any mobile device's QR code reader or managed through a desktop computer to record inventory and inspection information for each piece.

Get all the styles, design, and comfort options you want with our custom handmade aprons.

We currently offer many different fabric styles to choose from including **our new** Fresh Air Collection, Solids, and Patterns.

Let us help keep your Burlington aprons in working condition with our wide range of repair and alteration services. We accept minor apron repairs up to five years after the purchase date. Burlington Medical is committed to making radiation protection disposal easy for you as we continue adopting eco-friendly business practices. Contact the Customer Care Team for questions regarding Burlington garment disposal.

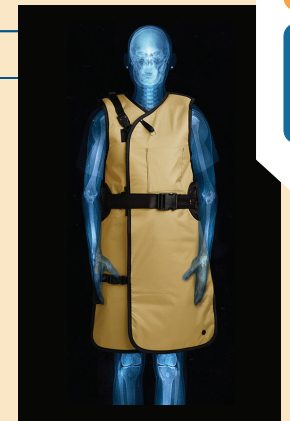

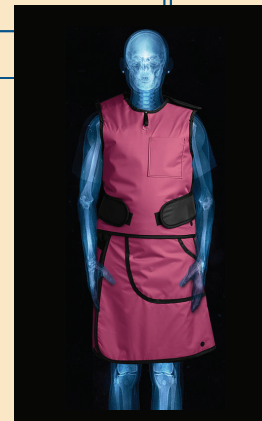

Burlington  
Medical

POWERED BY  **XENOLITE**

**Burlington Medical engineers the highest quality and lightest weight lead aprons in the industry. We are experts in the health and safety concerns of providers working in a radiation environment.**

## APRONS & OTHER WEARABLES

We are the only major lead apron provider who offers **fully tailored protective apparel**. Every panel of our tailored aprons are cut to our customers' exact measurements so providers are not wearing one extra ounce of protective material.

Burlington Medical also carries many other personal protection accessories such as:

- Thyroid Shields
- Radiation Attenuating Gloves
- Caps / Hoods
- Leg Wraps
- Sleeves

## EYEWEAR

Our protective eyewear options are designed for **comfort, weight distribution, and style**. Our glasses provide stylish radiation and laser protection.

## BARRIERS & DRAPES

Protect against radiation with our Porta Shields, Barriers, and Drapes.

## PRESSURE MANAGEMENT

- Foam Positioners
- Gel Pads
- Sandbags
- Toboggan Arm Guards
- Medical Mats
- Table Pads

## STORAGE & SUPPLIES

Protect your investment by storing your radiation protection apparel on our sturdy and durable lead apron racks. Burlington offers a variety of storage options designed specifically to keep your X-ray aprons **organized, accessible, and in good condition**.

- Single Hangers
- Wall-Mounted Racks
- Apron Bags
- Apron Cages
- Mobile Racks
- Apron Locks
