# Imaging Excellence Advisory Services

At 3DR Labs, we understand the operational challenges you face every day. That is why we have created our **Imaging Excellence Advisory Services**. Whether you need assistance determining solutions to your department's pain points, or you have the solutions, but not the bandwidth, we can help.

## OUR APPROACH

Our expert Imaging advisors can provide creative, practical, sustainable solutions even for your most difficult department challenges, including:

- Collaborative, unbiased data driven approach coupled with comprehensive qualitative analysis
- Expert analysis of your specific pain points
- Detailed findings report
- Tactical strategies and customized issue resolution plan
- Implementation resources
- Outcome analysis

## OUR BACKGROUND

- Program founded and built by former Imaging Directors
- Over 50 years of tactical and clinical imaging experience
- Experience in every role ranging from technologist to system level director
- Active members of ASRT®, ARRT®, and AHRA
- Subject matter experts in change management and process improvement

**Let us tackle your pain points head on and help you achieve  
your department's goals.**
