

How Can AIROS Help You?

Clinicians

Lymphedema therapists, vascular surgeons, wound care professionals, podiatrists, family doctors, cardiologists, and various other healthcare providers rely on the therapy our medical technology provides.

Patients

Individuals living with lymphatic and venous disorders utilize our device and garment systems every day in the comfort of their own homes to reduce swelling and pain, increase mobility, and live more comfortably.

Durable Medical Equipment Suppliers

Our team includes DME veterans well-versed in billing and insurance. We pride ourselves on offering the high-quality products, consistent communication, and responsive support DMEs need to be successful.

Advanced Compression Therapy Technology
Ease of Use for High Compliance
Improving Quality of Life

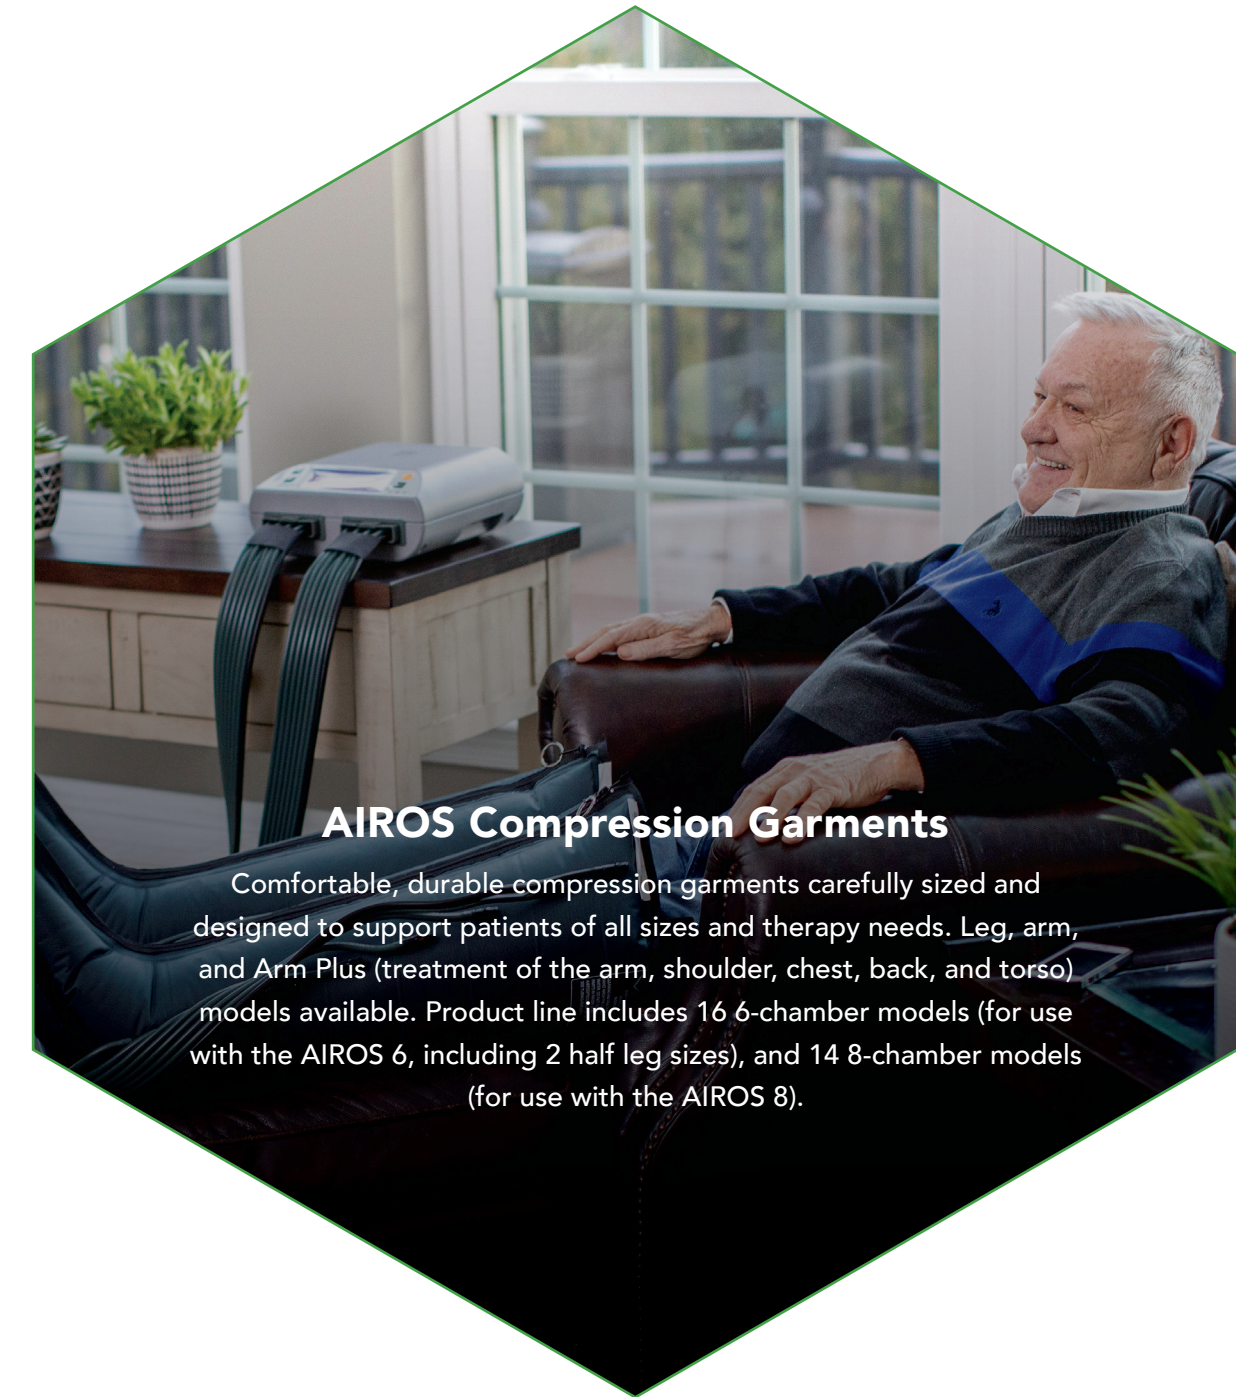

AIROS 6 Sequential Compression Device

6-chamber pneumatic compression device featuring a fixed gradient sequential compression mode and two Lymphedema Preparation Treatment (LPT) Modes. Advanced device serving the Medicare population (billing code E0651) and commercial insurance market. Used with 16 models of AIROS compression garments (leg, arm, and arm/shoulder/chest).

AIROS 8 Sequential Compression Device

8-chamber pneumatic compression device featuring a fixed gradient sequential compression mode, an adjustable pressure mode, and two Lymphedema Preparation Treatment (LPT) Modes. Primarily used in the commercial insurance market, but also reimbursed by Medicare (billing code E0652). Used with 14 models of AIROS compression garments (leg, arm, and arm/shoulder/chest).

AIROS Compression Garments

Comfortable, durable compression garments carefully sized and designed to support patients of all sizes and therapy needs. Leg, arm, and Arm Plus (treatment of the arm, shoulder, chest, back, and torso) models available. Product line includes 16 6-chamber models (for use with the AIROS 6, including 2 half leg sizes), and 14 8-chamber models (for use with the AIROS 8).
