

TAMPERPROOF INMATE FITNESS EQUIPMENT

Outdoor-Fit specializes in tamperproof and weatherproof correctional indoor and outdoor fitness equipment.

With equipment in over 500 correctional facilities across North America, jail administrators choose Outdoor-Fit to provide fitness equipment that can withstand the high-use and demanding environments of correctional facilities.

BENEFITS FOR JAIL ADMINISTRATORS

TAMPERPROOF, NOT TAMPER-RESISTANT

Outdoor-Fit uses tamperproof stainless steel rounded head carriage bolts with the nuts inside the padlocked center column. Most other companies use tamper-resistant hardware.

KEEP STAFF AND INMATES SAFE

There are no removable parts on any Outdoor-Fit product that inmates can use as weapons to injure themselves, other inmates, or correctional officers.

EXERCISE IS POSITIVE FOR INMATE MENTAL HEALTH

The benefits of exercise go beyond just the physical ones. Inmates with access to fitness equipment can better manage depression, anxiety, and anger.

CARDIO EXERCISE WITH REAL BENEFITS

The EVEREST Cardio Climber provides a legitimate cardiovascular workout that will make your inmates healthier mentally and physically, reducing possible medical expenses incurred by the facility.

ACCOMMODATE MORE INMATES IN A SMALL AREA

With our multigym design, you can offer exercise to more inmates in less space than you could with alternative fitness equipment.

OUR EQUIPMENT LOOKS DIFFERENT BECAUSE IT IS DIFFERENT.

OUTDOOR-FIT
exercise systems

Fitness equipment built specifically for corrections, tested in the world's harshest environments.

Outdoor-Fit Exercise Systems has been a leader in correctional grade fitness equipment since the early 2000's, supplying over 500 facilities with our equipment.

We take a unique approach to inmate fitness. To build products that have no removable parts, that last for years in any corrections environment (indoors or outdoors), and that keep your footprint small to maximize space - they have to look different. With a 15-year warranty and a wide selection of multigyms and purpose-designed single exercise stations fit for any facility, our equipment is built differently and built to last.

BUILT TO LAST
