MedTrust
provides
customized
healthcare
solutions that
are
realistically
priced,
people-
focused and
data-
conscious.

RFP Management

With decades of experience working with the RFP process, MedTrust can manage your entire inmate healthcare bidding process, from pre-solicitation to contract award. MedTrust can expertly even handle contract negotiations.

Staffing

MedTrust began as a staffing agency and excels in meeting client staffing needs, both short term and long term. Our team of recruiters can staff almost any need you have. Our specialty is long term medical staffing, but our staffing experience is broad and deep. Using MedTrust employees to staff your positions provides a fixed rate and eliminates, hassles that often accompany managing employees, such as human resource and disciplinary issues.

Recruiting

Frustrated in trying to hire that hard-to-find position? Let MedTrust help. We will mobilize our nationwide team of recruiters to find, screen and present candidates who will meet your needs...guaranteed, of you pay nothing, zip, zero! At MedTrust we stand behind our word, even during those rare times when we come up short.

Telemedicine

Maximizing onsite services and reducing offsite transports impacts safety, security and financial matters for a correctional facility. MedTrust's team of medical experts can help reduce offsite transports through telemedicine services. We can also ensure quality mental health services are provided when mental health professionals can be challenging to get to come onsite.

Behavioral Health

Dealing with behavioral health issues is a major component in the management of a correctional facility. MedTrust Behavioral Health leadership brings years of successful management within the correctional setting. We can provide and train staffing for you or manage your entire mental health program...all in compliance with NCCHC, ACA and state standards.

Contract Monitoring

MedTrust has a team of seasoned healthcare professionals intimately knowledgeable on all aspects of inmate healthcare services. Regardless of the standards applicable to your facility (e.g., NCCHC, ACA, State...), our team can provide contract monitoring of inmate healthcare services to best ensure you receive the services your healthcare provider has contracted to deliver.

First and Co Responder

MedTrust leadership brings current and proven experience embedding and assisting law enforcement with mental health co-response and first responder team members. Law enforcement is critical, and deescalating individuals in mental health crisis is on the rise. Our trained mental health staff can assist.

Program Management

With more than 20 years of correctional healthcare management experience, MedTrust leadership can manage part or all of your inmate healthcare program.

Jail Diversion Services

Locking up offenders is expensive. More and more minor crimes tied to mental health issues are diverted from jail to community treatment. MedTrust's mental health professional can develop programs and administer treatment within your community, thereby reducing inmate populations.
