

ECOSECURITY[®] UTENSIL

The Safest, Disposable Utensil for patients at risk of harming self or others ALSO helps reduce the spread of COVID 19

EcoSecurity Utensil (ESU) is designed to help reduce incidents of suicide and harm to self or for at risk patients. Used by over a thousand of hospitals, psychiatric facilities, rehabilitation centers and other facilities around the world, ESU is also helpful in reducing the spread of viral matter because they are the only truly safe utensil that is disposable.

They are made from a smooth, moisture-resistant, eco-friendly FSC certified* paperboard, much like a paper cup, and much greener than plastic utensils. In one simple fold, they become the perfect sturdy, eco-friendly scoop for foods that don't require a knife.

“We use ESU as a standard item for safety trays for patients on suicide watch at Kaiser Permanente.”

*Edmund Delmundo, Senior Department Clerk, Nutrition Services,
Kaiser, Santa Clara, California*

ESU, a proven solution for:

- Suicide watch
- Self-harm/trauma patients, including cutters and swallowers
- COVID 19 quarantine
- Emergency Rooms
- Memory care units

How can ESU help with some of your safe meal challenges?

- As recommended by the CDC for COVID quarantine, all meal remnants should go into a lined trash bin kept in the isolation area. ESU goes right into the bin, preventing others from handling contaminated material.
- Prevents suicide and injury caused by utensils
- Allows more dignified options for meal service than fingers-only menus
- Designed with safety perforation for quicker breakdown if ingested
- Avoid potential humanitarian issues caused by lack of safe utensils
- Ultra-compact to store, FDA approved and eco-friendly FSC paperboard.

“We love ESUs: they reduced the risk for self-harm that stem from plastic utensils. Our other segregated units also have asked to use them for their high-risk population.”

Nehemiah V. Porsona, MS, DRN, California Institute for Women

Purchase ESU through these healthcare resellers:

- US Foods
 - Aramark
 - Sodexo
 - Morrison Healthcare
