CHADIS

PATIENT ENGAGEMENT SOLUTION + CLINICAL PROCESS SUPPORT

Engaging the patient from pre-visit to post-visit

- automated questionnaire assignments/requests
- pre-visit reminders
- separate teen input and private teen education and resources
- contact free check-in and registration
- options for mobile payments
- access to community resources and individualized patient education based on questionnaire results, provider choice, or patient search
- teacher and other caregiver input by invitation

Supporting the clinician from pre-visit to post-visit

"Lets me be a doctor again."

- pre-visit data allows focus on priorities, collects and scores data in real time with interpretive note
- helps write clinical notes
- graphical communication aids for shared decision making
- facilitates between-visit monitoring with graphic representation over time
- "refer button" option for positive screen to connect with local agency/professional
- ABMS approved-MOC 4 & CME options
- population data collection & reporting

Data Collection

Proprietary

Open source or custom of your choice

Providing and accessing patient generated data has never been so easy.

BENEFITS TO PATIENTS

- list concerns and goals prior to visit for better patient centered care
- early identification of problems for earlier, more impactful intervention
- better outcomes
- easy access to personal education and resource listings
- improved patient satisfaction

BENEFITS TO CLINICIANS

- allows visit focus on what matters while pre-visit data provides completeness and "checks boxes"
- reduces documentation burden
- saves time
- supports telehealth with remote online pre-visit data & post-visit education
BENEFITS TO CARE SYSTEMS AND PRACTICES

- improved workflow efficiencies through online screening and scoring
- app for automated appointment reminders, and remote check-in and payment
- helps meet regulatory/certification standards (e.g., Medicaid, ACA, PCMH)
- increased income through billable CPT codes
- facilitates required reports such as Quality Improvement data for systems

INTEGRATED WITH MANY EHRS

CHADIS

"CHADIS generates income. It saves staff time, it saves paper, it saves printer ink, and it doesn't tie up your room as long. I just ran my numbers from 2020, which was a slow year, and my return on investment at 140% of Medicare was eight-fold what I paid for CHADIS.

So, it generates income, you get information ahead of time, which allows you better time to prepare for the visit, it allows the visit to be more directed, parents can input their concerns and you can be prepared ahead of time to address those concerns. Most of all it is better overall for the care of the patient. It is a win-win all the way around."
