

The solution to your equipment needs

McKesson Biomedical Solutions™

Equipment services you can count on

Manage all your medical equipment needs with McKesson, including equipment service, rental and device management for infusion, enteral, ventilator and light respiratory devices.

Our solutions:

Specialized support team

Work with a team committed to helping meet your business needs, including:

- **Dedicated** biomedical equipment specialist
- **Knowledgeable and communicative** customer service
- **Clinical and product** support

Dependable equipment service

Know your equipment is well-serviced and patient-ready. McKesson offers:

- **Preventative maintenance (PM) and repairs**, including support in the event of recalls or warranty issues
- **Over 150** technicians and an experienced quality assurance team
- **Seven ISO 13485:2016-certified** service centers nationwide, adhering to industry-leading quality and patient safety standards

Extensive equipment rentals

Choose your equipment rental options from leading manufacturers:

- **Access over 70,000 patient-ready devices** from more than 50 different models
- **Customize** by short- and long-term rental options

Equipment management tools

Make equipment management simple with technology solutions tailored to your needs:

- **Submit and track** service requests, place rental orders and request rental returns through our easy-to-use self-service web portal
- **Automate equipment service and repair records** with real-time visibility of device location and service needs, as well as service history documentation using McKesson OneTrack®
