

KabaFusion
Patient-Focused Infusion Therapy

LET US BE YOUR HOME START PN INFUSION PHARMACY

DID YOU KNOW?

- Some adult patients may meet criteria to start PN in the comfort of their own home.
- Our team can reduce health care costs by eliminating the need for a hospital admission to initiate PN.

About Our Services

KabaFusion offers home initiated PN service by our experienced clinical team of Certified Nutrition Support Clinicians. The team will clinically assess the patient's unique situation to determine if the patient is safe to initiate PN at home.

What the KabaFusion Team will need to get you started on an at home PN program:

- Patient demographics
- History and Physical
- List of allergies
- Clinical notes indicating need for PN
- Weight Trends
- Current Medications
- Plan for obtaining central venous access device

Patients may qualify for the home start PN program if:

- ✓ Seen by their prescribing provider in the last month
- ✓ Failed enteral feedings or enteral feedings are not medically feasible
- ✓ Gastrointestinal disease without excessive GI losses
- ✓ Have an oncology diagnosis and are unable to be fed enterally
- ✓ Has malabsorption for a prolonged period of time
