

WellSky® Resource Manager for Home Infusion and Infusion Centers

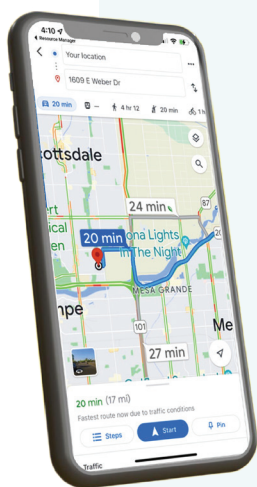

◆ Mobile resource management for infusion providers

The home infusion market is expanding, and providers are seeking new ways to improve outcomes and increase their revenue by offering services both at home and in infusion centers. To thrive in this rapidly evolving industry, you need a technology partner that is as dynamic as the market itself. That's where WellSky comes in.

With **WellSky Resource Manager**, you can:

- **Schedule and manage appointments with ease**, using our flexible scheduling system which accounts for the needs of both patients and staff.
- **Improve clinical performance** with customized assessments and intuitive patient care planning.
- **Track your mileage in real-time**, resulting in more accurate reimbursement calculations, fewer administrative burdens, and less overhead.

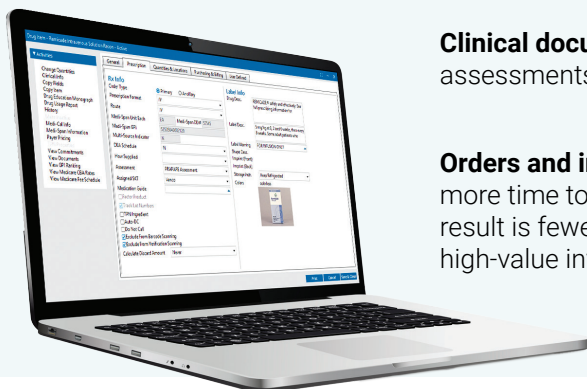

Built for better, more efficient care

Mobile-friendly platform: Our intuitive mobile app offers convenient access to your entire daily appointment list, complete with patients' phone numbers and addresses. You can even provide estimated arrival times to patients and providers, improving communication and reducing wait times.

Streamlined scheduling: Experience top-of-the-line scheduling capabilities, thoughtfully designed for the needs of home infusion and infusion center providers. Patients can schedule appointments easily and receive automated reminders, reducing the risk of missed or delayed treatments, while staff can quickly access crucial information to make more informed decisions.

Forecasted and actual mileage tracking: Effortlessly capture your mileage in real-time, ensuring more precise reimbursement calculations and reducing administrative burdens.

WellSky® Resource Manager for Home Infusion & Infusion Centers

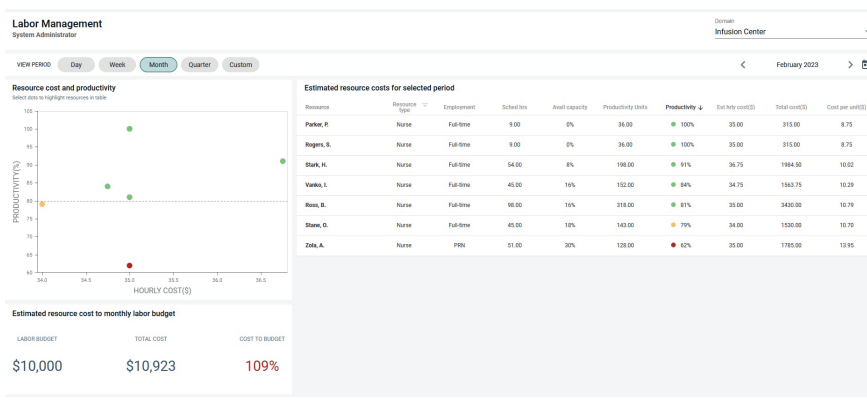

Clinical documentation: Improve clinical performance with customized assessments and intuitive patient care planning.

Orders and inventory: By optimizing inventory management, staff can allocate more time toward patient care while also preventing medication shortages. The result is fewer missed appointments and the prevention of excessive aging of high-value inventory.

Unique features for infusion centers

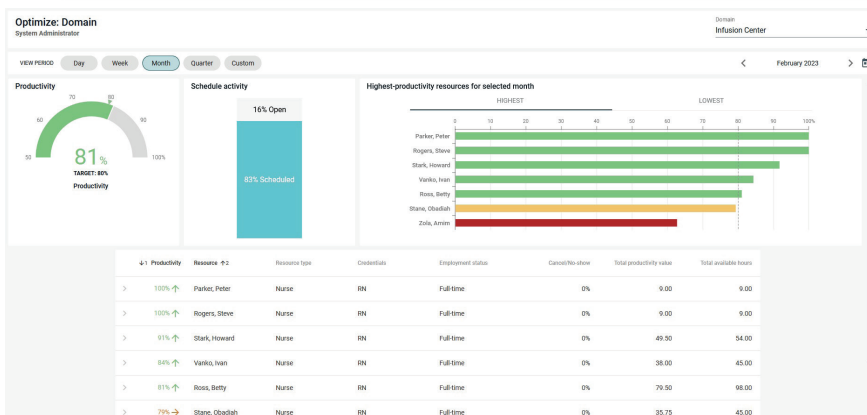

Best-in-class scheduling

With our intuitive scheduling tool, you can prevent overbooking by taking into account chair and clinical team availability. Additionally, you can set up an appointment buffer to ensure that there is enough spacing between appointments, helping to prevent clinical team burnout and improving patient satisfaction.

Staffing optimization and resource utilization

Our solution streamlines labor management and optimizes resource utilization in infusion centers by providing a comprehensive overview of utilization patterns and insights (into things like cycle times, volumes, wait times, and add-on patterns). Easily track past performance and identify opportunities for improvement in order to enhance operational efficiency and ensure optimal use of resources.
