

LS/CMI System Administration

Flexible integration solutions, it's your choice!

Public Safety agencies worldwide leverage automation to create efficiencies within their organization and improve outcomes for their communities.

With the large volume of case-related data generated by public safety organizations day-to-day, it's critical not to miss key pieces of information or incorrectly organize and store data. Cloud-based case management creates fast and flexible access to the latest versions of case files while freeing up time for more human-centered activities providing better outcomes.

By combining risk assessment with case management in a single system, the LS/CMI gives public safety agencies all the necessary tools they need to determine risk and manage cases in a single application. Here is a quick snapshot of the info you need to help choose between case management system options when implementing the LS/CMI within your organization.

Multi-Health Systems Inc. (MHS) holds individual privacy to be of primary importance and is committed to the confidentiality and safeguarding of all personal information collected. Our privacy policies are inclusive to all MHS online platforms, including our commercial website, application products, and assessment portals.

G.E.A.R.S.

The GIFR Electronic Assessment and Reporting System (G.E.A.R.S.) is a highly configurable assessment and case management platform.

Who can use it?

This cloud-based digital risk assessment platform is available to any customer who wants to administer tools electronically. If you do not have a portal to house your assessment and case management data, this streamlined platform is for you.

Features

- ✓ Fully digital administration
- ✓ HIPAA and PIPEDA compliant
- ✓ Automatic scoring and reporting
- ✓ Can be used on an Android or iOS tablet
- ✓ Includes easy to understand visual representations of client's results
- ✓ Reports are customizable allowing a user to choose what information is included
- ✓ Customizable goals, interventions, and case management module
- ✓ Manage access and transfer clients from one user, or institution, to another
- ✓ Real-time Risk calculator for transparency
- ✓ Configurable case management functionality to improve treatment matching

INSIGHTS APP / Integration via Microsoft D365

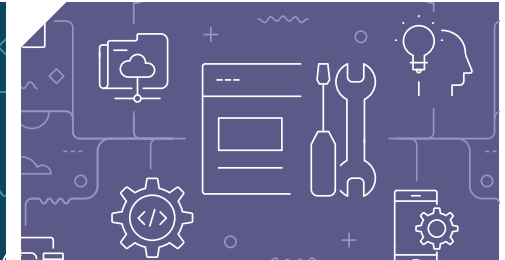

This MHS application Insights App is built within Microsoft's Power App technology that fully integrates with Microsoft Dynamics 365 workflows.

Who can use it?

This platform is available to any customer who wants to access assessments programmed right into their workflow by integrating D365. If you are using D365 already or looking to leverage this powerful platform, this technology is for you.

Features

- ✓ Easy integration into already existing D365 system allowing users to administer assessments and generate reports through D365
- ✓ HIPAA and PIPEDA compliant
- ✓ A helpful insights page allows a user to see a "snapshot" of all evaluations without downloading the full report
- ✓ Access to end-to-end solutions offering a 360-degree view of your client's journey by maintaining current information on each individual
- ✓ Merges resources and consolidates tools into a central command center that operates from a single database removing the need for multiple entry

Integration via Application Programming Interfaces (APIs)

MHS product access APIs are designed to enable rapid, frequent, and reliable delivery of large, complex applications. They are hosted globally in Microsoft Azure, eliminating physical hardware concerns.

Who can use it?

This platform is available to any customer who wants to integrate LS/CMI or any MHS assessment into an existing case management system using our APIs. Sections 1 through 7 of the LS/CMI are available via the API and can be combined with third-party case management functionality.

Features

- ✓ Easy integration into your organization's existing system without needing to leave already created workflows
- ✓ HIPAA and PIPEDA compliant
- ✓ APIs are universal and can be reused for additional MHS products with little to no additional effort
- ✓ Includes documentation and additional integration support services are available through our training and advisory services

How are you combatting officer burnout and turnover?

Does your case management system support treatment matching and customizable goals?

Are you supporting your staff against the stressors associated with corrections work?

Is algorithmic transparency in your assessment important to you?

Does your case management system drive fairness and equity?
