

N ear[®]

THE MOST COMFORTABLE EARPIECE IN LAW ENFORCEMENT

N•ear 360

Series of In-Ear Micro Speaker Earpieces

N•EAR 360™ ORIGINAL

The N•ear 360™ Original holds 5 patents and delivers the most advanced **Knowles armature micro-speaker** in the world. The patented bend on the **N•ear 360 Original has the best in-ear stability of the 360 series**. The earpiece twists into the ear canal with zero ear fatigue and stays comfortably in place no matter how long you wear it. Designed for voice communications with the sophistication to handle smartphones and push-to-talk applications. The comfort is amazing and the audio lets you hear every single word crystal clear.

N•EAR 360 FLEXO™

The N•ear 360 Flexo™ launched in January 2022 and is the successor to the N•ear 360™ Original. The patented 360 Flexo™ bend over the ear twists into the ear canal with zero ear fatigue and stays comfortably in place. The N•ear 360 Flexo™ holds 4 patents and delivers the most advanced **Knowles Armature Micro-Speaker** in the world delivering precision sound quality at low or high volume. **The N•ear 360 Flexo™ Single is designed to be worn in either the left or right ear**. Designed for voice communications with the sophistication to handle smartphones and push-to-talk applications. The comfort is amazing and the audio lets you hear every single word crystal clear.

N•EAR FLEXO DYNAMIC

The N•ear 360 Flexo Dynamic™ launched in July 2022 and is the successor to the N•ear 360 Flexo™. The 360 Flexo™ patented bend over the ear twists into the ear canal with zero ear fatigue and stays comfortably in place. The N•ear 360 Flexo Dynamic™ holds 4 patents and delivers the most advanced **Dynamic Micro-Speaker** in the world. The New Dynamic Micro Speaker delivers a full sound of crystal clear communications. The Dynamic Cone Speaker is more cost-effective than an Armature Speaker and produces slightly more base. **The N•ear 360 Flexo Dynamic™ Single is designed to be worn in either the left or right ear**. Designed for voice communications with the sophistication to handle smartphones and push-to-talk applications. The comfort is amazing and the audio lets you hear every single word crystal clear.

N-ear Protectr®

Communications & Hearing Protection Series

Universal Size Ear Mold

Hear externally while being protected. Our Universal Size Ear Mold is an inexpensive platform that allows users to choose the ear tip size needed S, M, L.

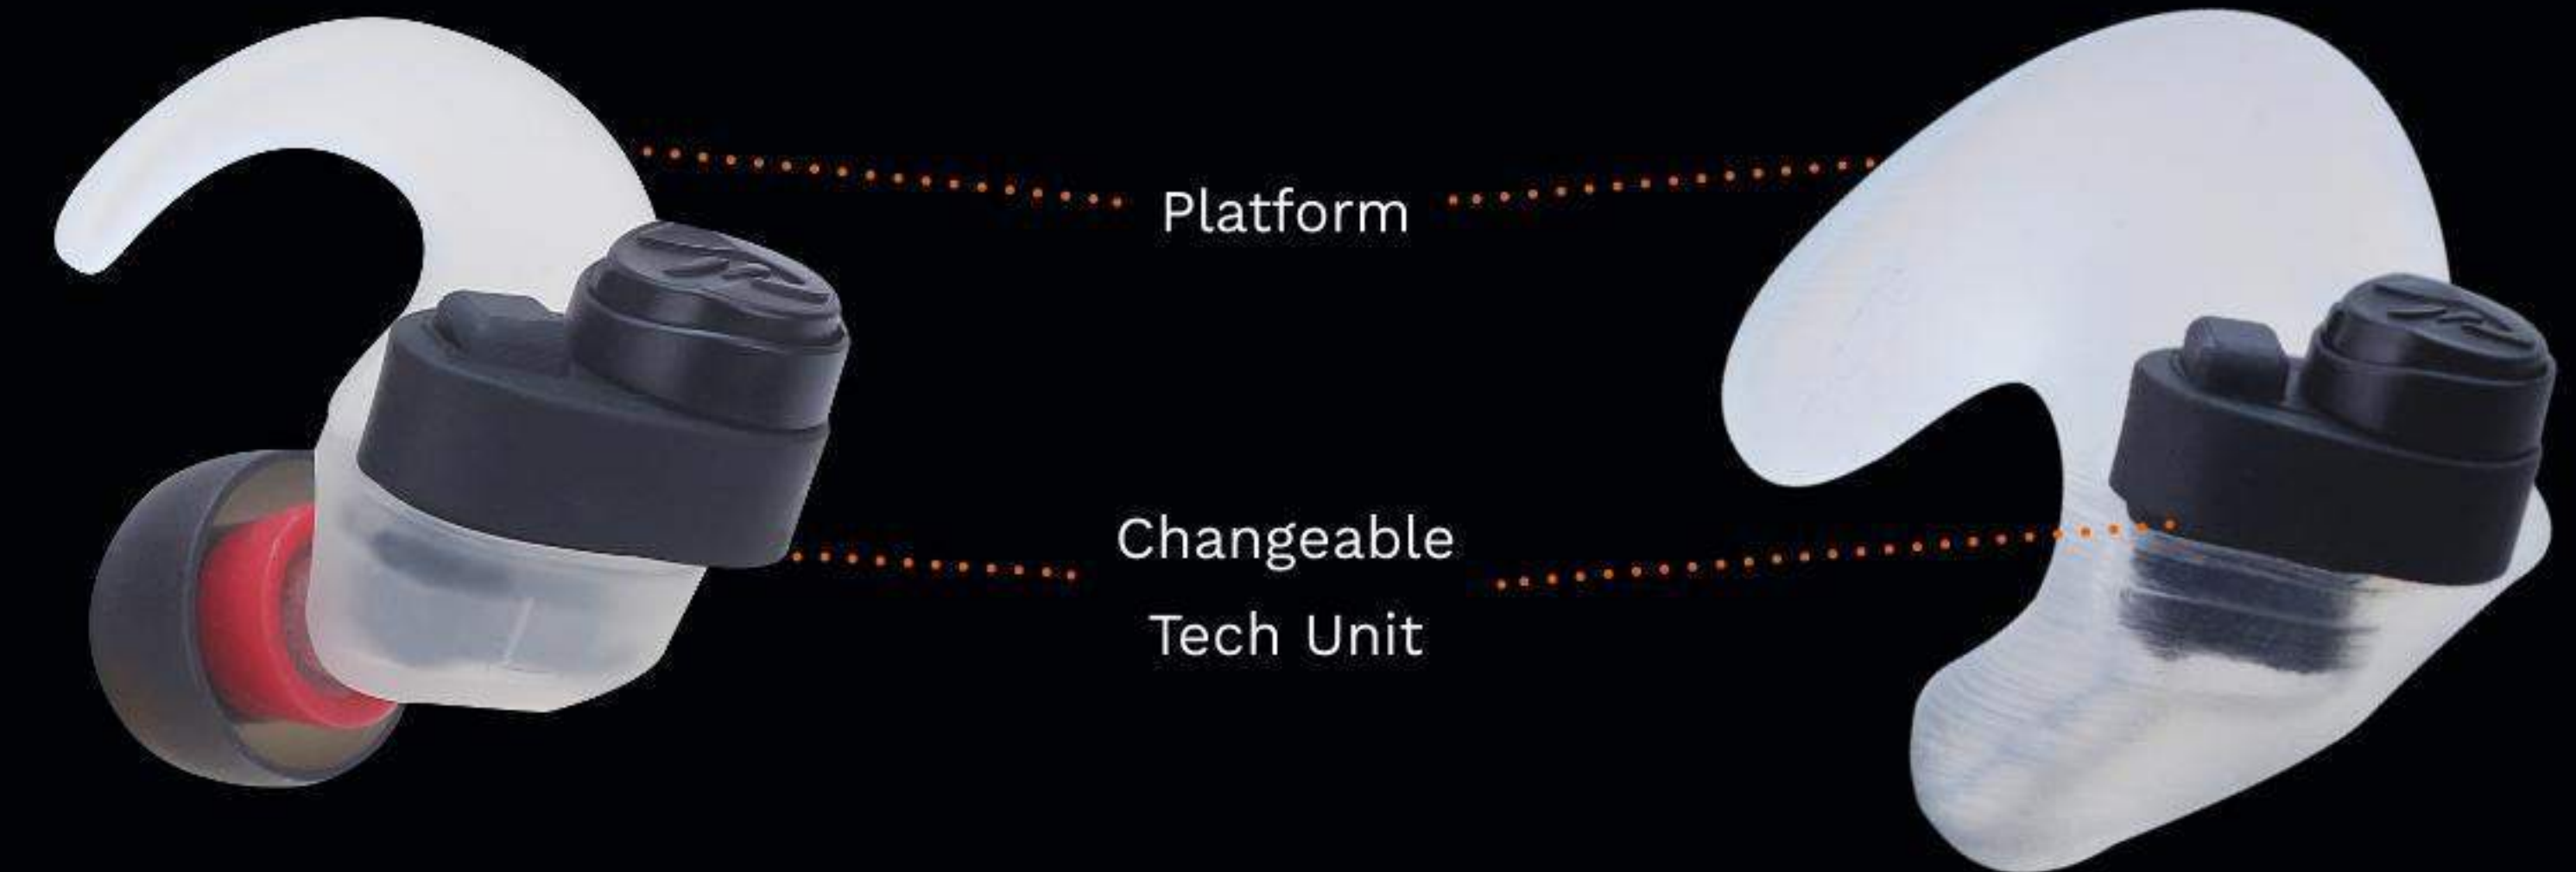

The ear fin holds the Universal Ear Mold perfectly into place. Made from biocompatible irritation-free Thermoplastic Elastomers (TPEs).

Customized Ear Mold

Hear externally while being protected. N-ear can scan your ears in under a minute to get customized earmolds.

Individuals and agency employees can become customized ear mold scanners. Scan right onsite.

Because it's your inner ear, the mold fits perfectly in your ear. Made from biocompatible irritation-free Thermoplastic Elastomers (TPEs).

Universal Ear Mold Platform with Communications and Shooting Hearing Protection Tech Unit

N•ear Protectr®

Hearing Protection Series

N•EAR Customized Ear Molds

N•ear offers customized ear molds that fit perfectly to your ears. We use Apple iPhone facial recognition technology to scan your ears within 1 minute while never actually touching you. Painless and easy.

Our Customized earmolds are good for approximately five years before your ear will change enough to require a new set. Each earmold is electronically saved for replacement needs.

The Protectr™ platform allows you to change the Tech Unit at any time. Simply pull away from the earmold housing to change to optional tech units.

Shooting Hearing Protection Tech Unit

Our Shooting Multimode Hearing Protection filters 20-30 tech unit filter is ANI IPIL certified for impulse noise up to 166dB where it provides 33 dB of attenuation, ensuring optimum protection from the highest levels of impulse sound.

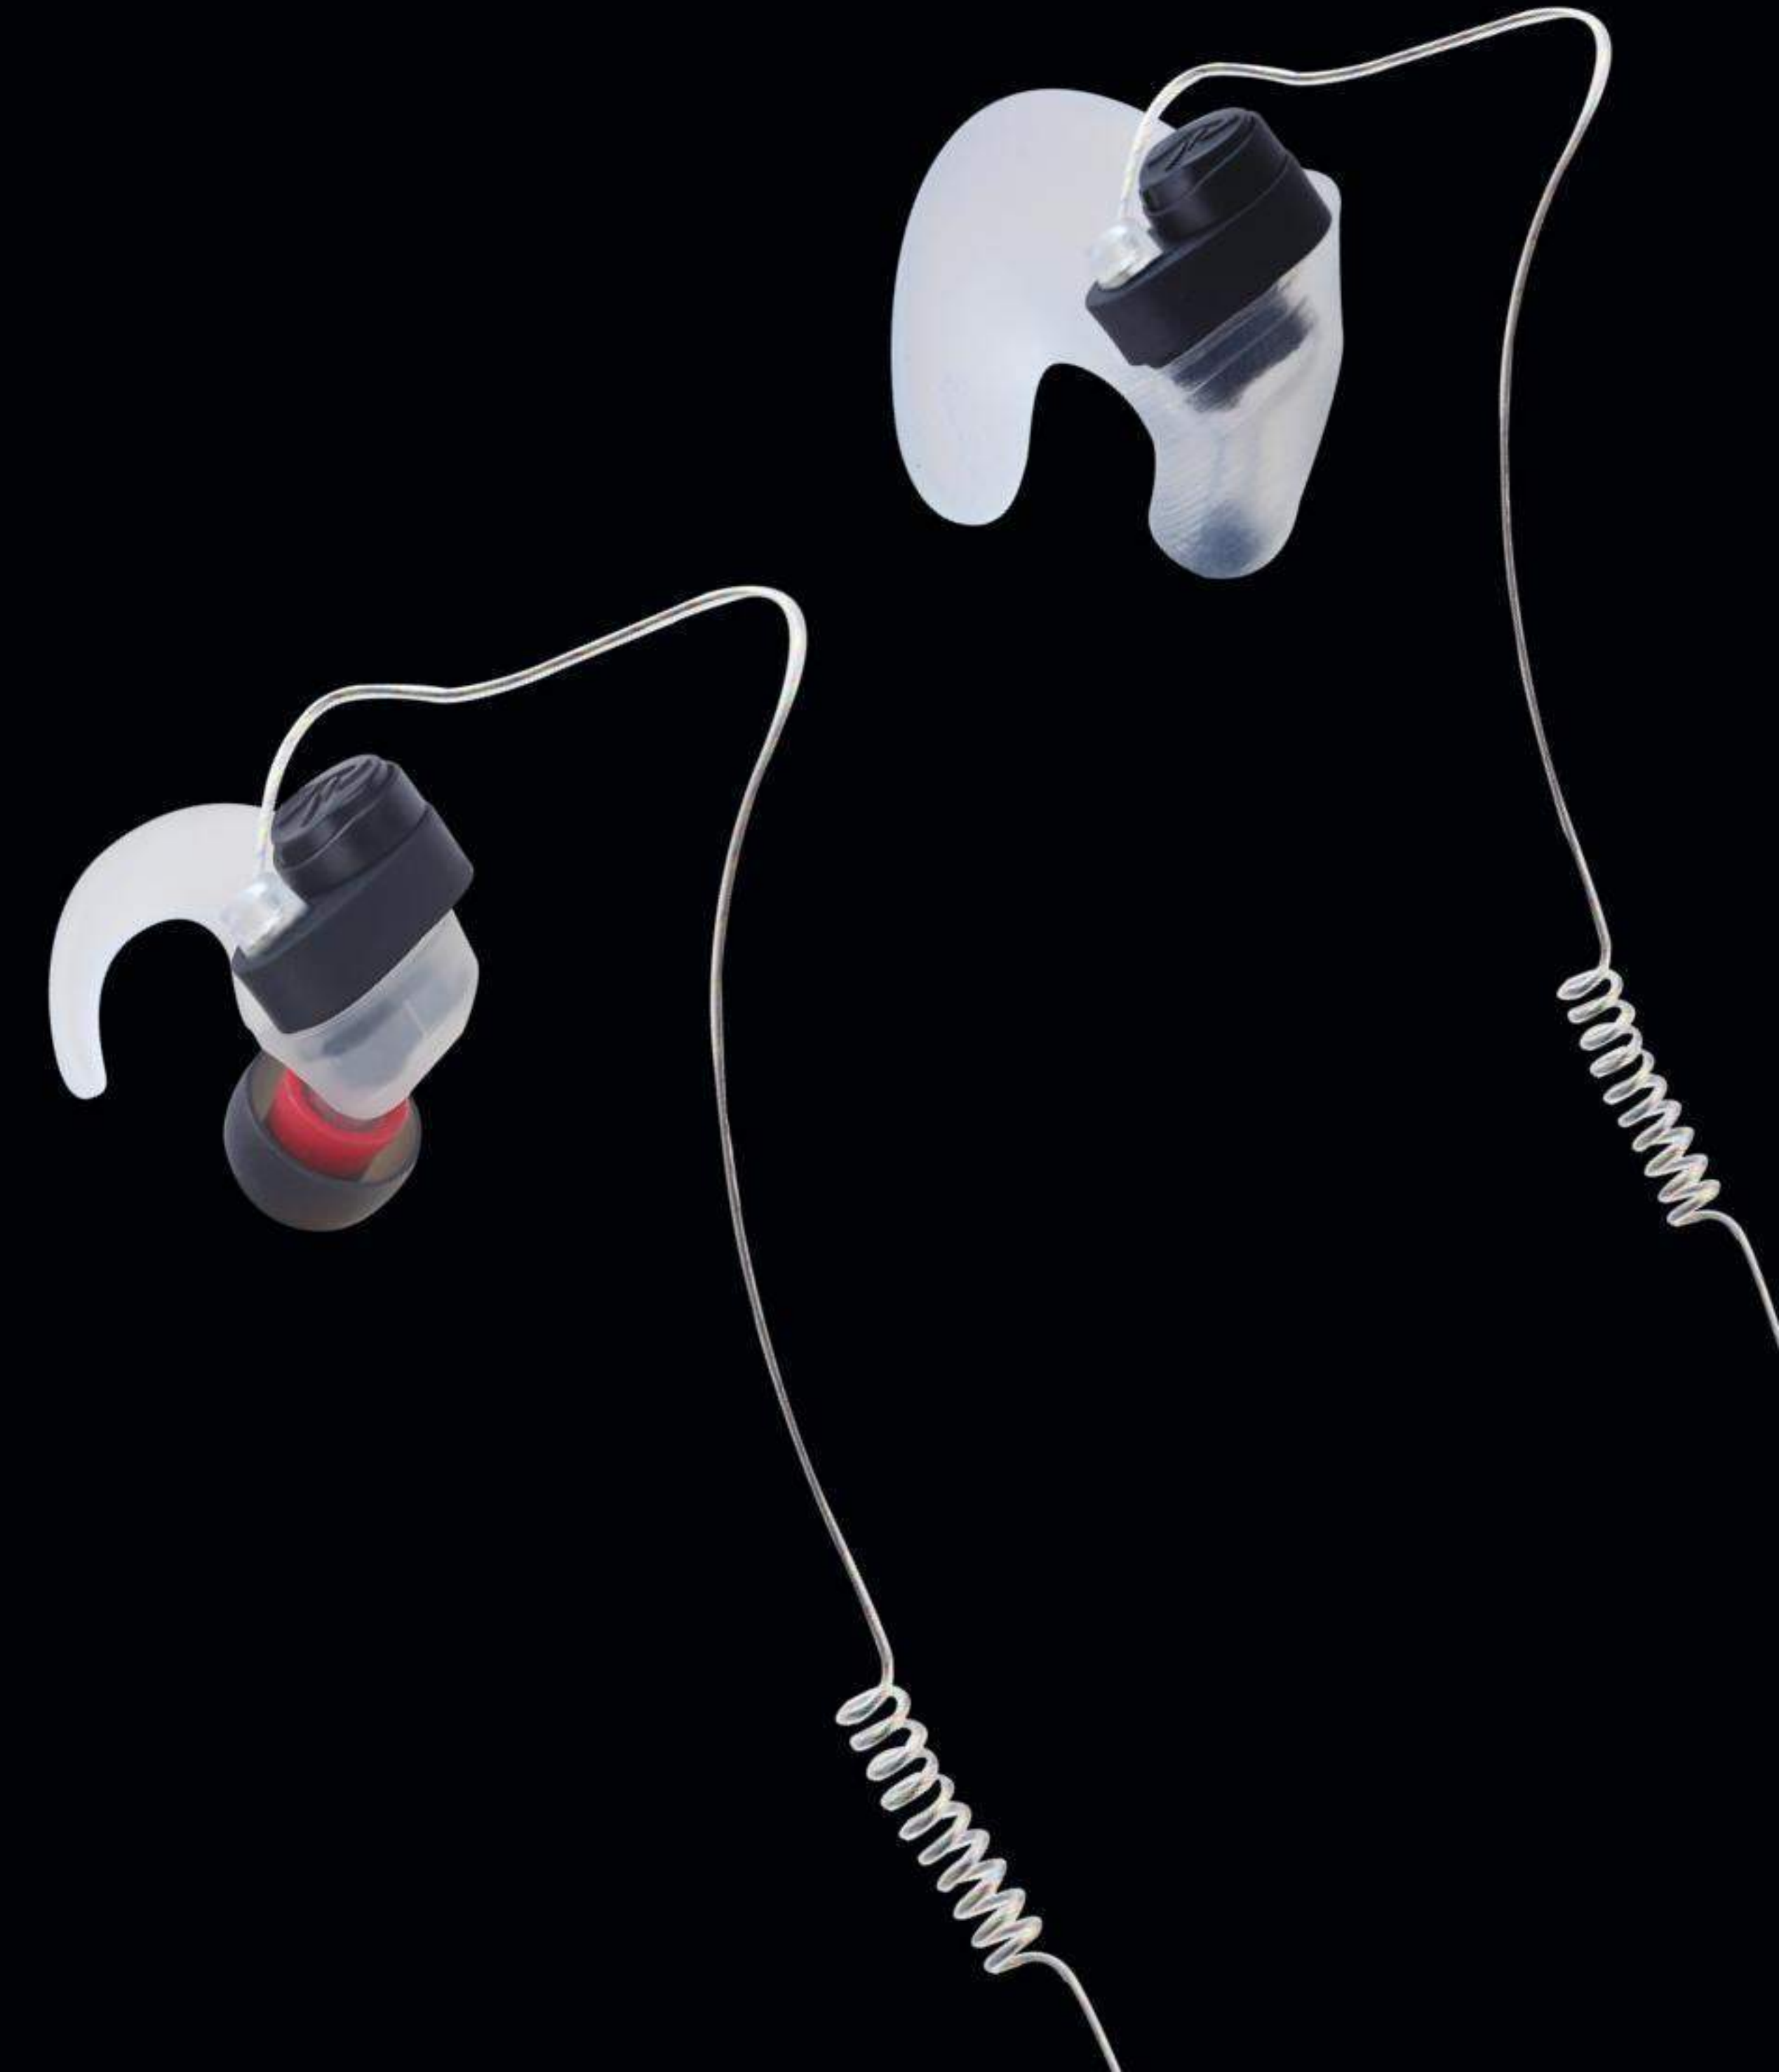

N•ear 360

N•EAR 360 FLEXO™ Communications with Shooting Multimode Hearing Protection Tech Unit

Hearing Protection with the comfort and sound quality of the N•ear 360 Flexo™. The N•ear 360 Flexo™ holds 4 patents and delivers the most advanced **Armature Micro-Speaker** in the world delivering precision sound quality at low or high volume.

Our Shooting Multimode Hearing Protection filters 20-30 tech unit filter is ANI IPIL certified for impulse noise up to 166dB where it provides 33 dB of attenuation, ensuring optimum protection from the highest levels of impulse sound.

N-EAR CUSTOMER SERVICE SECOND TO NONE

Whatever you need is just a phone call away.

“Last month, my agency and the local community took a catastrophic hit due to Hurricane Ian. While executing relief efforts, my push-to-talk mic was damaged in the process. I spoke to multiple representatives with N-ear who not only replaced my damaged unit IMMEDIATELY, but the extremely supportive staff went above and beyond and provided my agency with numerous products all of which were dispersed to troops in the field.

N-ear already provides a solid product for our nature of work, but the quick responses and understanding I received were able to shed some light on an already tuff situation.

These products DRASTICALLY outweigh any competition in the market. N-ear cares and has earned my business and recommendations for life. Please let this review speak for itself, if you are on the fence about purchasing, don't be. You will not regret it”.

ACCESSORIES

Get the most out of your N-ear 360 Series Earpiece

Ear Tip and Clip Options

N-ear offers a variety of ear tips and clip options. The standard ear tip, which has an open design providing full situational awareness for the user. If you like medium ambiance where you can hear a bit of the outside environment, choose the tulip ear tip. Lastly, if you need an ear tip, which provides low ambiance, choose the double flange ear tip.

Patented Ear Wax Filters

The Patented Ear Wax Filters are a tool designed to change the white speaker filters in the N-ear 360 earpiece.

Only under extreme circumstances should the speaker filter get clogged with dirt and affect the performance of the N-ear 360 earpiece. The Ear Wax Filters are available in packs of 8 units, which, when used properly under normal conditions, will easily last for the lifespan of your 360 earpiece.

Adaptors

We have multiple ways to connect your N-ear Earpiece to speaker mics, SnapLock Base PTT, and even to your existing earpiece system. So whether you get a 3.5mm N-ear Earpiece or the SnapLock, you can easily adapt to your specific requirements and gear.
