

Corrections professionals have higher rates of burnout, PTSD, anxiety and depression.

Learn how Mental Health First Aid can help you address the mental wellbeing within your corrections facility.

The Mental Health First Aid for Corrections Professionals course can help your facility:

Create a new path of resilience and wellbeing.

Reduce costs associated with untreated mental health conditions.

Reduce stigma and discrimination.

Increase employee productivity, morale and retention.

Improve overall safety.

Address mental health and substance use challenges.

Let's Talk
