Simply Innovative

What is IPFusion®?

IPFusion® is commercial off the shelf electronic security control software that can connect any number of systems, devices, and technologies together to create unparalleled situational awareness and facility control.

IPFusion® utilizes a graphical drag-and-drop configuration toolset to reduce risk and provide solution repeatability.

No coding or scripting is required.

Our Vision

To innovate in the pursuit of simplicity.

Our Mission

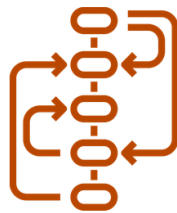

Empower organizations to connect technology, uniting systems to provide efficient insight and control.

Full Security Awareness

IPFusion® can provide safety and security to facilities and institutions by connecting systems together regardless of manufacturer or vintage. This unique software makes it possible for an electronic security solution to be tailored to the unique needs of any facility and easily expanded as needs change over time.

Customizable Workflows

IPFusion® has a powerful workflow engine which allows truly customizable interactions between systems of any type.

Utilizing the drag-and-drop toolset, workflows are quick and efficient to configure. Workflows can be templated and used for many projects that share similar needs.

Safety Through Security

IPFusion® offers protections against unauthorized access or control within your facility. Access to IPFusion can be controlled at a fine level to ensure that operators only have necessary access to the system.

IPFusion® is integrated with Microsoft Active Directory for Single Sign-On (SSO) support.
