

## Enabling scientific Discovery

FORMULATRIX® collaborates with researchers to simplify the preparation and analysis of proteins and nucleic acids by designing solutions without boundaries and bringing novel cutting-edge technology to the life science industry. We supply software and laboratory automation solutions to the top pharmaceutical companies and leading academic research institutions working in a variety of genomics and proteomics applications. Our team works tirelessly to simplify life science workflows to save you time, money, and resources so you can achieve your next breakthrough. We are committed to researchers, their labs, and to the scientific discoveries that will improve the lives of generations to come.

Markets

:

Liquid handling; software and robotics for automating protein crystallization; sample concentration and diafiltration

Size

:

Over 1100 employees worldwide

Incorporation Date

:

2002

Ownership

:

Private, 100% employee-owned
